Chinese Army Seeks Withdrawal Of U.S. Troops From All Far East

-- By James Reston

PEKING, AUG. 1 (NYT).spite President Nixon's recent firsts to establish normal relaens with China, powerful ofidals of the People's Liberation paray are mounting a campaign alling for total withdrawal of miled States troops not only wn Taiwan and Vietnam but so from South Korea, Japan, in Philippines and Thailand.

During celebrations of the 44th whiting of the Communist armforces, the army opened to the it military exhibit in Peking of stressed political functions of he simed services at home and

on the whole, this exhibit cm-2022ed that the army is not at a fighting force but a work and a production force as full However, the presentation with a statement that the buy is "determined to liberate resecred soil of Taiwan." Army was highlighted by a recep-for the Central Committee the Chinese Communist party the Peking diplomatic corps. which Huang Yung-cheng. Thy in the presence of Premier though and Chiang Ching, the the of Chairman Mao Tse-tung. alled for withdrawal of all I the world.

U.S. Withdrawal

"United States imperialism" he must completely withdraw aggressor troops from Indo-Mina, the southern part of fores, Japan, the Philippines and ul other countries and regions which it has occupied and stop interference in the internal attairs of the people of the Middle East and the Arab people

as well as the peoples of Asia, Africa and Latin America."

Gen. Huang added to the applause of the audience of over 1,000 when he said, "We are determined to liberate Taiwan. The United States must withdraw all its military personnel and military installations from Taiwan Province and the Taiwan Strait area. We firmly oppose any schemes of creating two Chinas: one China, one Taiwan, or an independent Taiwan. The liberation of Taiwan is China's internal affair, which absolutely brooks no foreign interference."

No Sign of Compromise In short, there is no evidence here that the Chinese government is preparing the Chinese people for any compromise with President Nixon on the Taiwan issue or anything else. Gen. Huang's speech contained a denunciation of "Japanese militarism," which he said is being organized by

"United States and Japanese

reactionaries." There has still been not one single word of official commeotary or analysis here about the forthcoming Nixon visit or the Kissinger mission which arranged lt. Officials here talk about what position Mr. Nixon will take regarding the China seat in the United Nations but say they have no official information from Washington about his intentions. "We are like the hridegroom in an old prearranged Chinese marriage," they say, "We are just waiting for the wedding day to see what the bride looks like."

and radio continue a drumbeat of propaganda against the Nixon administration's policies in Taiwan. Southeast Asia and Japan and condemn the Nixon doctrine as a device to militarize Japan and "let Asians fight Asians."

Meanwhile, the official press

From Whe Dispotches HOUSTON, Aug. 1 .- The two American moon-surface explorers triumphed today in the iongest

outing of their three-day lunar "This crater is a gold mine," Apollo-15 commander David R. Scott, exclaimed to mission control here as he and fellow moonman James B. Irwin explored Spur Crater, a deep depression 2.8 miles from their Falcon land-

Jubilantly, they called out descriptions of different - colored rocks they took as specimens for later study by scientists on earth. Flight director Gerald Griffin

was ecstatic in Houston, saying: "I think without a doubt we're just witnessed the greatest day of scientific exploration that we've ever seen in the space program, possibly of all time." Another official bere said the rocks today were "quite possibly material from which the primeval moon was

Col. Scott and Lt. Col. Irwin debated whether some of their glassy rocks looked green, with Col. Irwin radioing to Houston: Remember about green cheese (the childhood myth that this what the moon is made of). Hope it is green when we get home!" In fact, the sun's glare and the gold of their protective visors affected their color vision, and they were thought to have found rocks representing a rain-bow of colors—greens, oranges, grays, whites and clear-glass in

Their outing today, midway through their moon exploration, was a record for a lunar expedi-tion—7 hours, 12 minutes and 46 seconds, figured from the time landing module before going outside to their lunar rover. Actual time spent outdoors was six and three-quarter hours.

The trip in the rover and afoot on the moon surface-against a background of towering mountains filmed clearly for millions of television viewers on earth-covered 7.8 miles, according to noofficial estimates here. That, too, is a record.

Change in Itinerary

The farthest destination that had been programmed for today was Front Crater, about five miles from their base, the Falcon landing module in which they had touched down gently at 2216 GMT Friday and which is to take them off the moon tomorrow for rendez-yous in lunar orbit with the mission's command module.

But they changed their itinerary today and scrubbed plans for Front Crater in ex-citement over what they saw in Spur Crater. Staying there until oxygen consumption dictated a return to the Falcon, they raked up rocks which may be samples of the moon's original crust, possibly formed four billion years ago, or more. The sparkling stones would be far older than any found on earth.

The outing today—which in-cluded a third stop, for more samples, en route back from Spur Crater to the Falcon-had begun an hour and four minutes late because of more of the small problems which have cropped up, and been conquered, since the \$445-millioo. 13-day mission

hegan last Monday. First, Col. Scott mopped up a puddle of water behind Falcon's main engine cover, water that had dripped from a chipped plastic connector in their drinking-water system. Ground controllers said the system had lost 25 pounds of water, "which puts

Some Soviet Advisers Reported Leaving

Breach Widening Between Sudan and Russia

KHARTOUM, Aug. 1 (UPI) .--Sudan has told the Soviet Union to cease its protests about this country's countercoup purges by tomorrow, political sources said today. They added that some Soviet advisers already were leaving Khartoum.

Sudan tonight decided to recall its ambassadors in the Soviet Union and Bulgaria, Cairo's Middie East News Agency said.

The ultimatum, which the sources said was handed to the Soviet Embassy here yesterday, contributed to the deteriorating relations between Khartoum and the Kremlin in the wake of an abortive leftist conp nearly two

A countercoup 72 hours later and said "absolutely innocent returned President Gaafar Numeiri to power and touched off a purge which sent 14 alleged rebei leaders, including the head the Sndanese Communist party, to their deaths.

Bloody Terror' Political sources said the Sudanese government did not detail what actions it might take against the Soviets, but indicated there might be moves against some 1.800 Russian advisers stationed

in Sudan. In what the Soviet Embassy said was an official statement, the Tass news agency described the Numeiri-ordered trials of alleged rehels as "bloody terror"

people" were being condemned. The Tass report drew protests from the Numeiri government, later clamped down on dispatches filed from Khartoum hy Soviet and Eastern European

Political sources said today some Soviet advisers in Khartoum were refusing to go to work and that some 20 already had left the country since the trials and executions began.

The government also stepped up its search for four Communist party Central Committee members it said were involved in the Radio and television re-(Continued on Page 4, Col. 5) it a little bit closer to redline, pair's first outing on the moon but it's still above redline," the safety margin for vital supplies. Next, an air hubble had to be

cleared from Col. Irwin's backpack water tank, hy emptying the tank and refilling it. The hubble had caused irritating warning signals to sound in his helmet earphones yesterday, during the

they explored yesterday, collecting several pounds of rock and soil samples and taking scores of photographs. Yesterday, as it did today, their television apparatus transmitted remarkably clear color pictures back to earth. They were supposed to head south today to the foothills of the Apennines and cast along the mountain front to the two craters called Dandelion and Front. But mission control had told them that it was "dealer's -the ilinerary was up to them to arrange as they went along, and they stopped at Spur Crater, two-thirds of the way along their prearranged path.

"My, oh my, that is as big a mountain as I ever looked st," Col. Scott said of his view of Mount Hadley Delta, at 15,000 feet the highest mountain in the Apennines

Righ Hops

In kangaroo-like hops in the light-gravity atmosphere, they went on foot downhill after leaving their vehicle and got excitedly to work, raking up rock samples in Spur Crater.

"We found what we came for!" was the excited message radioed back to earth as the astronauts eyed the crystaled rocks, which scientists hope will turn out to be anorthosite.

Anorthosite is composed almost entirely of plagioclase, a mineral containing calcium, aluminum and silica, and differs from the darker basalls found by the crews of Apollo-11 and Apollo-12. Basalt is formed from lava flowing on the lunar surface, and would have cooled more quickly than anorthosite formed from molten material from beneath

the moon's ancient subsoil. "The find is very significant." said Dr. Gene Simmons of today's discovery. Dr. Simmons, chief scientist at the Manned Spacecraft Center in Houston, added: "We're eager to get our hands on it." Noting Col. Scott's ideotification of the rock samples as anorthosite, the scientist added: "I'd put a (tet of a) case of beer on it, that he's right."

"Joc, this crater's a gold mine." Col. Scott shouted to ground communicator Joseph Alleo ln Houston

"And there might be diamonds (Continued on Page 2, Col. 1)

Tourists' Look at the Moon

DAVID SCOTT 11330 GMT, Saturday).—As I stand out here in the wonders of the unknown at Hadley, I try to realize there's fundamental truth to our nature. Mao must explore. And this is exploration at its greatest.

Well, I see why we're in a tilt. There's so much hummocky ground around here; we're on a slope of probably about ten degrees and the left rear foot pad is probably about two feet lower than the right rear foot pad. And the left foot's a little low too. But the LEM looks like it's in good shape. The rover's in good

shape. Rather interesting sight, Houston. I can look straight up and see our good earth hack there. JAMES IRWIN (1334 GMT) OK, Dave, I'm going to come oo

SCOTT-A rather interesting

New Camera Produces TV Spectacular

Picture Quality Is Extraordinary

By John J. O'Connor NEW YORK, Aug. 1 (NYT).-"This ought to give the folks back home something to look at."

That's the way one of the three Apollo-15 astronauts put it as he set up the televisioo camera for transmission of pictures. As it turned out, be was absolutely

It seems this time around that the astronauts will have to share some of their glory with a silent fourth partner—the color-tele-vision camera. The camera. manufactured by Radio Corp. of America but employing a color system devised by the Columbia Broadcasting System's Peter Goldmark, proved itself startlingly effective in the first several hours of the current moon explorations.

Picture quality-in terms of definition, color and dimensionwas extraordinary. With the camera mounted on the lunar rover, mobility-along with remote-control in Houston-made for a dramatic increase in flexibility.

From sweeping vistas to remarkably detailed close-ups of working tools or moon dust clinging to the boots of the astronauts, the results were uniformly impressive.

Considered solely as a television "spectacular." the flight of Apollo-15 needed the boost supplied by the extraordinary transmission of television pictures. The mass public is indeed a fickle animal, prone to becoming quickly blase about major events.

Using the familiar variation. initial excitement dissipates into an attitude of "When you've seen one moon shot, you've seen them

MOONFALL—Col. David Scott stumbles after leaning over to take pictures of Lt. Col.

James Irwin digging trench. Col. Irwin moves in to help his partner regain his feet.

Astronauts Jubilant Over Finds

(Continued from Page 1) in the next one," Mr. Allen shout-

ed back. The two astronauts alternated between raking the dusty lunar surface to sort out rocks, and

picture-taking,
"That's a jackpot," mission control messaged as Col. Itwin, in one swipe, picked up 15 rocks. "Put them in a hig pile and I'll be right over," Col. Scott told

his partner. "I'll get you a hag. You did get a bunch." Holding up a sample that Col. Irwin thought looked green, Col. Scott said: 'T've got to admit it really looks green to me, too, but I don't believe it." Col. Irwin teased: "Green cheese?" Col. Scott went on: "Oh my, it is green. Fantastici Man, look at that!

"Oh, it's gray," Col. Scott said after a pause. "The visor makes It look green, Jim. It's a very light grain."

Col. Scott picked up another rock and said he saw a distinct joint between materials of different color or texture. "Oh, look at this, Jim! What a

contact: man, oh, man, I've got about a four-incher, Joe.' Col. Scott said one side was hlack, fine-grained basalt and the other, also fine-grained, was

"Oh, look at this one!" Col. Scott cried.

"Diamonds, huh?" Col. Irwin said as he saw the sparkle. "It looks like a hig piece of glass. Look at the glass. Shiny. a glass-coated breccia," replied Col. Scott, referring to material made of tiny compressed. fragments of other rocks.

"Dave and Jim, we're very pleased with your documented samples," Mr. Allen radiced from

Col. Scott was so excited that he disregarded instructions from the ground to pass up taking a sample of one big rock. "It looks like it's been exposed a long time," Col. Scott observed. "All we need now is soil from

this area," Mr. Allen told Col. Scott, "We're making money hand over fist.

some walnut-size rocks, and they said they already had a bag

The astronauts' enthusiasm was such, and the slopes were so sharp, that Col. Scott fell once, leaned over to take a picture of Col. Irwin digging a trench. Col. Irwin, who fell twice in the pair's first outing yesterday, helped him up. As they sped back toward the

ed the vehicle's speed to the point where the bouncing of their wheels was recorded by a seismic device they had planted near their landing module earlier.

They stopped once, at Dune

Crater, for more samples. The valley road back followed the route they had taken out. Noting the crisscrossed tracks, Col. Scott said: "Tracks upon tracks, Looks like a freeway." "Almost there," said Col Irwin. "Home, sweet home," said Col.

"Going to drop you off right here, Jim," Col. Scott said as he pulled up beside the Falcon after the long drive at speeds of seven and one-half miles an hour (an "outdoor record," mission control joked),

Astronauts Use Suit Designed for More Flexibility

HOUSTON, Aug. 1 (WP).-The Apollo-15 astronauts were a newly designed spacesuit when they explored the moon yesterday so they could get in and out of the iunar rover and bend down to

pick up rocks. "We think we're going to have n great deal more comfort in this suit." Lt. Col. James B. Irwin who explored the mon with Col. David R. Scott, said.

The suit contained a mart of water in a bag with a straw on the right side of its neck and a small apricot bar on the left side so that the astronauts could aip and snack as they prowled

But, basically, the changes were in special joints added to the rigid spacesuit at the waist and neck to provide added mobility. In past missions, astronauts have complained that their suits' rigidity was uncomfortable and made work on the moon difficult.

4th U.S. Flag He told the astronauts to get Flies on Moon

HOUSTON, Aug. 1 (AP).—For the fourth time, an American flag has been set in place on the

The Apollo-15 astronants James Irwin and David Scott put the flag in position near their lunar lander Sunday. Television viewers on earth

were able to watch.

Mission control told the astronauts: "Beautiful, just beautiful." One of the astronauts replied: "It looks pretty good to us, too."

Scott, Irwin to Cancel Special U.S. Stamp

WASHINGTON, Aug. 1 (AP) .-Astronauts James B. Irwin and David R. Scott plan to cancel a special United States stamp tomorrow commemorating their moon walk if all goes well, the U.S. Postal Service says.

The stamp depicts the astronauts on the lunar rover on the moon surface, with the lunar module, the earth and the sky in the background. The issue will be available at post offices throughout the United States on Tuesday.

million instrumented scientific station they had set up yester-

Col. Scott had, on starting back from Spur Crater today, indicated that their rock-sampling had been tiring. "Gee, it's nice to sit down, isn't It," he said on getting into the rover, "It is," Col Irwin agreed.

"It's a good deal," Col. Scott commented about their motorized travel on the moon. "Hop off and work like mad for ten minutes, and then sit back down and take a break.

Col. Scott later exclaimed whoopsi" as they bounced over rock, "Some of those babies sneak up on you." Later, he joked: "I'm going to be seasick."

The pair performed other tasks, near the Falcon, today, Near the landing site, Col. Scott completed a surface "temperature-taking" experiment which was stalled yesterday when his power drill became stuck. He had more trouble with the drill today, and had to use a wrench to disengage it from the stem. He lowered a heat sensor down the bored hole. This, together with an instrument lowered yesterday, will tell scientists the rate of heat flow from the interior of the moon and the thermal conductivity of the lunar material.

Col. Irwin, meanwhile, almost single-handedly performed geological tasks assigned, but not accomplished, in an earlier part of the mission. He scooped out a trench and took more samples near the Falcon. He reported hitting bedrock at a depth of 14

to 16 inches. He also tested the strength and other mechanical properties of the soil, using a self-recording penetrometer. As he pushed it in, the force used and the depth achieved were measured on an instrument which he then detached for its return to earth.

'Show Bir' Lamentable Col. Scott, at the end of his endeavors, was puffing, and his comments about "show hiz"-as he followed Houston's instructions to turn on the TV camera for another live telecast-indicated a shortness of temper. "OK, Joe," he told Mr. Allen in Houston, why don't you just give us about five minutes with no comment and just let us cool It for a while?'

But he cheered up again as Col. Irwin tapped a flagstaff into the moon surface, hitting it twice "so It will stay up here for a few million years," and mounted an American flag on it.

The two Air Force colonels then each took turns standing by the flag and saluting while the other snapped pictures.

Then they loaded their rock samples and supplies into the Falcon, got inside and closed the hatch at exactly 1800 GMT. "It's 50 much nicer outside," Col. Irwin commented as they repressurized the landing module for their pights rest.

Two Miles of Film

SPACE CENTER, Houston. Aug. 1 (UPI).-It would take the average family on vacation 333 years to use the amount of film Apollo-15 will expose on its 12day moon mission. Space agency spokesmen said the surface and aerial photography of the moon and the earth will take up to two miles of film.

The current navigation system. developed by the Boeing Co. for its rover vehicle, should continuously indicate range and direction to the starting point of each lunar trip. The dashhoard instruments also show the momentary speed of the vehicle and the distance traveled, as on an automobile. The system works as follows:

After the rover has been aimed

in what the astronauts estimate

is the proper direction for the traverse, they flip up the sun

shadow device on their dashboard.

As in a sun dial, a wire under this device throws a shadow on a read-out scale. A leveling indicator then rotates to two positions to show pitch and roll angles of the rover in case It is on a slope. These angles, plus the sun shadow reading, are radioed to earth and the astronauts are told their precise heading. They then adjust their gyro-compass accordingly. For the first traverse, the compass

was pre-set at 270 degrees to

minimize this "torquing" adjust-

Because the spinning compass retains its orientation regardless of the rover's twists and turns, it tells the little computer, or signal processing unit, the direction being indicated. Odometers on the wheels Indicate the distance covered, enabling the signal unit to keep track of the movements with respect to the startcamera on. Now we're getting ing point.

. An embassy spokesman explained that a meeting with Mr. Caramanlis would be "part of the ambassador's continumg effort to keep in touch with representatives of the Greek politi-

This unusual publicity was interpreted here as part of an American Embassy attempt to apply pressure to the Athens government to speed up the promised restoration of constitutional rule and also to win back Greek friends who are critical of Washington's support of the government,

Mr. Tasca, who flew to Washmgton Friday, was severely critirived last March in a report by Foreign Relations Committee. two investigators of the Senate failed to keep in touch with deposed political leaders and other opponents of the four-Trigear-old government and had not exerted effective pressure for the restoration of parliamen-

The American Embassy in este for Afficia bas since broadened its political contacts, sometimes in-voling the displeasure of government officials. Early in July, Mr. Tasca flew to Italy to meet King Constantine who has lived there in exila since his abortive attempt to unseat the present rulers eight months after they seized power in a coup.

American Embassy contacts were expanded even more in recent weeks as the House Foreign Affairs Committee invited Mr. Tasca to testify during an investigation of Washington's policies-toward two authoritarian European governments — Spain and Greece.

The House committee has voted in favor of an amendment to the foreign-aid authorization bill that would cut off all American military aid to Greece until the resteration of constitutional government, unless the President certified in writing that such aid was vital to national security.

The anti-government move by a House committee generally inclined to keep out of controversial foreign policy issues was seen in some political quarters here as involving some change in the official U.S. attitude toward the Athens government.

N.Y. Policeman Kills 2 Brothers **Chasing Robbers**

NEW YORK, Aug. 1 (AP) .-Unaware that two running men were brothers pursuing two robbers, an off-duty patrolman ehot and killed them in an exchange of gunfire early yesterday, police

The brothers, Sergio Lugo, 40, and Thomas, 42, owned a Manhattan market that was held up shortly after midnight by two men who fled with more than \$600. One brother wounded a fugitive; the other suspect es-

The wounded suspect was Identified by police as Paul Atkins, 34, of the Bronx, who was hospitalized in fair condition.

Patrolman Albert Robertson ordered the brothers to halt and drop their weapons just after Sergio Lugo shot Atkins, Patrolman Robertson identified himself, but Sergio shot twice at the police officer, missing both times,

police reported.

The policeman then fired twice, hitting Sergio each time. Then, according to police, Thomas Lugo turned on the patrolman, striking him with a claw hammer. Patrolman Robertson fired twice at Thomas, hitting him both

World's Scientists Participate,

the shoulders of Col. David R. Scott and Lt. Col. James B. Irwin as they collected their samples and viewed the dramatic moon-

as excited as the men who cried out, on the moon: "Oh, there's some beautiful geology out here. The scientists on earth were

able to share in being the first to look down into a lunar rille—one of those mysterious, meandering canyons that cut across the moon's surface. They were able to marvel at

the rolling, dust-deep landscape and at the peculiar heaps of soil, or fillets, that had accumulated against some rocks as though a wind han once blown across the airless moon. They could share, as well, in

the special experience of gazing into the past, of looking at rocks, hills and mountains that have changed little in the last few hundred million years.

A Rig Difference

The carth's eurface features are continuously being altered by erosion, mountain-building and other effects, which are largely

absent on the moon.
One of the astronauts, as he looked at a rock partially imbedded in the surface dust, remarked that it had probably lain there undisturbed since before sea creatures first began to roam the oceane on earth.

Because of television and because of the diversity and scientific interest of the region being explored, scientists on earth had an unmatched opportunity to share in the experience.

It was, said Dr. Robin Brett. head of geochemistry at ths Manned Spacecraft Center, "like traveling on the Beagle and being with Scott."

It was the voyage of Charles Darwin on the survey ship Beagle that led to his theory of evolution. The ill-fated journey of Robert Falcon Scott to the South Pole was another scientific landmark. But both expeditions were conducted in isolation, for there was no radio contact between the explorers and the rest of the world.

Rille Seen Close Up

A close-up look at Hadley Rille. a mile from the landing site, was a major objective because such features have long puzzled students of the moon. Some of them meander like rivers, yet there almost certainly has never been flowing water on the moon. As the astronauts drove up to the rille in their rover they were able to look south to where the rille's full width and 1,200-foot came into view. The rille is V-shaped, but the explorers found a level area about 600 feet wide running along the bottom. as though the rille had been excavated for a huge highway. On the east wall, they could

see what seemed to be outcroppings of rock layers. Many geologists had hoped they would find such layers, indicating that the rille had cut through layers of lava or other volcanic material which had flooded broad areas of the earth-

facing side of the moon, forming the luner "seas." Such layers, lining the walls of the Grand Canyon on earth. represent sediment laid down on the floor of an ancient sea. But the lunar "seas" have presumably never been wet.

Probably the most widely hald theory for the rilles is that they once nnderground rivere of lava that remained as hollow tunnels after the lava flow ended. Such lava tubes on earth sometimes collapse to form canyon-like features, but this does not explain the snaking meandering of some lunar rilles. One of the most important tasks of the two astronauts was to conduct "radial sampling" on the slopes of Elbow and St.

George Craters. In radial samplings specimens ara collected at increasing distances from the crater rim in the belief that this will provide specimens from successive depths beneath the surface.

Tests carried out with highvelocity projectiles fired in a vacuum have shown that when impact craters are formed under those conditions, material nearest the surface is thrown the greatest distance and material from the greatest depth lands near the rim. The same effect has been demonstrated in underground nu-

Scientists hope that yesterday's sampling includes rocks thrown out from sufficient depths to represent lunar "bedrock"-if such

In any case, the camples may include rocks from the first billion years of the moon's lifetime. None of the rocks brought hack so far from the moon have been more than 3.5 blllich years old leaving a billion-year gap in man's knowledge of the moon's history. Filling this gap should cast light on the even more extensive blank period in the early history of the earth.

The most prominent fillet or dust shoulder, observed yesterday eaning against a lunar rock seemed to have been formed by the bulldozing effect of motion by the rock itself. However, the other fillets are less easily explained. Some scientists believe they manifest a peculiar erosion official Polish news agency PAP reported. All the crew were saved.

Way Cleared For Vote on Lockheed Aid

By Robert J. Samuelson WASHINGTON, Aug. 1 (WP). -Abandoning its support of legislation authorizing \$2 billion in loan guarantees to big business yesterday, the Nixon administration cleared the way for a final Senate vote tomorrow on a \$250-million loan guarantee for Lockheed Aircraft Corp. alone.

The retreat was made after the House late Friday night approved the \$250-million measure-not the \$2-billion bill reported from the Banking Committee by the narrow margin of 192 to 189,

By shifting its position, the administration was able to accept a compromise proposal by Lockheed's Senate opponents, who offered to end their nineday debate on the measure if the \$250-million legislation was sub-stituted for the \$2-billion bill-

The broader measure had been denounced heatedly by its opponents as a "slush fund" for big business that would enable inefficient, large firms to surviva on the basis of "political clout."

Little Confidence

Lockheed needs the \$250-million loan-which the company's banks ray they won't provide without a federal guarantee-to complete development of its TriStar jumbo commercial jet. In the final vote on the \$350-million guarantee bill, Lockheed supporters were given a small edge, but neithar side was issuing confident predictions.

"The close vote in the House indicates this proposal is very, very vulnerable," Sen. William Proxmire, D., Wis., Lockheed's most vocal antagonist, said yes-

Sen. Alan Cranston, D., Calif., a Lockheed supporter, said that the vote will be "very close, but I think we're going to make it." The margin of victory, he added, might be as small as three to five

The administration - w b i c h originally introduced the \$250million legislation only for Lockheed-actually preferred the \$2-billion bill, because it could generate additional support in

the Senate. "We always bad the votes for general bill," Sen- Cranston

The \$2-billion legislation could be sold as a measure that would potentially aid large businesses in many states, not just one firm its main manufacturing plants located in a few states.

Demands Nixon's 'Direct Approval'

By Victor Cohn

The Senate voted yesterday to require President Nixon'e "direct approval" before a disputed underground nuclear test can be exploded this year on Alaska's Amchitka Island,

in what is sure to be a continuing battle over the projected fivemegaton shot of a Spartan antiballistic-missile warhead. It is the biggest underground explosion ever planned by the United States,

fired by the Soviet Union. The Amchitka provision was part of a \$4.7-billion appropriation bill, passed 72 to 2, for water and power project development and the Atomic Energy Commis-

The total is \$100.9 million over Mr. Nixon's budget recommendations and \$140,7 million above the amount approved by the

Backed by anti-war environmental groups, Sen. Daniel K. Inouye, D., Hawaii, and several

sions will continue.

strike that has now idled a third

of the industry's capacity. But

there were no reports of progress.

Strike Deadline Is Extended For 24 Hours by Steel Union

By Frank C. Porter

WASHINGTON, Aug. 1 (WP). -The United Steelworkers of America yesterday granted a 24hour extension of their strike deadline to 12:01 a.m. tomorrow. This appeared to confirm fragmentary reports earlier that the

union and nine major steel producers had come close to agreeing on a final package. A 48-hour extension had been

by Secretary of Labor James D. Hodgson in a meeting late yesterday with USW president I. W. Abel and R. Heath Larry, chief management negotia-Mr. Abel said he felt 24 hours

was the longest postponement he could recommend to the union. Asked if the steelworkers' action stemmed directly from the Hodgson request, Mr. Abel replied, "not Even with the workers staving

on their jobs today, it was problematical how much work there would be for them. Most producers were in the costly process of closing down operations in anticipation of the strike.

Tha union'e 600-man Basic Steel Industry Conference, which has final say on any contract, voted to accept Mr. Abel'e recommendation only three hours before the previous deadline of 12:01 a.m. today. Mr. Abel said the "overwhelming majority" voted for it.

Package

Some sources said management had agreed basically to a package of the same overall size as that negotiated by the USW in cans, aluminum and copper. These contracts provide wage and benefit increases of about 30 percent over three years-or roughly 9 percent a year compounded. Mr. Abel said the conference will meet again tonight. In the

When independent voters are asked to choose between just Sens. Humphrey and Muslie, the winner is again Sen. Muskie, 51 percent to 28.

USIA Order: Tilt Your Blinds To Thwart the Camera Spies

WASHINGTON, Aug. 1 (NYT).-The United States Information Agency has ordered employees in its headquarters on Pennsylvania Avenue to tilt Venetian blinds upward at a 45-degree angle to foil would-ba spice with telescopic-lens "Because of new construction" adjacent to the offices at

1750 Pennsylvania Avenue, a memorandum to all employees said last week, security measures should be intensified. About 500 employees work at 1750 Pennsylvania Avenue and in the adjoining building. "With the advance in telephoto photography." the memorandum warned, "shots of sensitive documents lying on office

desks can be made from a long distance and the resultant prints are easily readable." One agency source disclosed that soma government-issued blinds hang vertically rather than horizontally. No guidance was offered in the memorandum as to how to resolve this

Robert Leeper, an agency spokesman, said that the memorandum had been prompted by the fact that the new office building now going up next door had already reached the second-floor level. The agency rents space between the fifth and tenth floors. Thus, Mr. Leeper said, the steel framework presumably, would soon afford unauthorized persons a place from which to spy into the offices.

WASHINGTON, Aug. 1 (NYT). stan by an international con-The United States, working behind the scenes, has won the agreement of both Pakistan and the United Nations to station an international group of 156 civilian relief and rehabilitation experts under UN sponsorship in East Pakistan, officials said yes-

Moreover, they said, the United States has notified U Thant, UN Secretary-General that it will contribute \$1 million at once as an initial payment to help the group organize end fly necessary equipment to Dacca.

Among the UN staff will be 73 monitors, who will be stationed at four area offices in Dacca, Chittagong, Rajshahi and Khulna and at 69 other locations. Each monitor will be linked by radio with a UN headquarters in

Dacca, qualified informants said. "The presence of 73 UN monltors, each reporting on conditions iu his area, may cool off pas-sions and damp down military reprisals," one informant said. 'It's not the UN function to do tois-but it will be an important side cffect.

'Ray of Sunshine'

One official described the agreement of Mr. Thant and of President Mohammed Yahya Khan to the proposals for a UN group in East Pakistan as "the only ray of sunshine in an otherwise gloomy situation."

Pakistan's agreement in the UN force is said to have been inspired largely by unremitting but unpublicized U.S. pressure. In recent years the United States has contributed about \$200 mil-lion ont of the \$450 million a year in economic aid to Paki-

Heath Leaves Boat Race for Clyde Debate

LONDON, Aog. 1 (Reuters),— Prime Minister Edward Heath has decided to abandon his yacht racing weekend at Cowes and return to London tonight to prepare for an emergency debate on the Upper Clyde shipbullding crisis in Parliament tomorrow. Since Friday, Mr. Heath has been at Cowes captaining Britain's team competing in the Admirals Cup series of races and skippering his own yacht, Morning

The present series of races goes on until tomorrow. Given good weather, it should have ended just in time for Mr. Heath to have been flown back to London so that he can be in his place opens at 3:30 p.m.

The opposition leader, Harold Wilson, had threatened to make an issue of Mr. Heath's absence if, by continuing his yachting, he missed the debate or was late. Today, bowever, Mr. Heath decided to return to London tonight so that he can discuss the Upper Clyde issue with the minister responsible. John Davies, be-

forc the debate opens. The emergency debate, demanded by the Labor opposition, is expected to result in one of the biggest parliamentary battles for a long time. The opposition is criticizing the government for closing down a major part of the Upper Clyde group and throwing thousands of men out of work. The government is laying the hiame for the group's financial collapse on the former Labor government, whileb set it up with public money when it was in

Shipyard Occupied

Meanwhile, workers are still occupying the shipyard and insisting that they will stay there, for two years if necessary. They claim to have had assurances about a continuation of supplies but the big problem facing them

A suggestion they made yester-day, that Britain's 10 million trude unionista should raise £5 million for working capital to enable the workers to run the shipyard was rejected today by Vic Feather, head of the union move-ment. He said that it was not realistic and the unions themselves did not bave that kind of

Today shop union leaders at the yard deciden to ask local municipal authorities to take over the threatened yards as a municipally owned venture.

NOT SOUND BUT SAFE-Some passengers being removed by stretcher from the emergency landed Pan Am Jumbo at San Francisco's International Airport Friday. the 212 people aboard, 36 were injured, four seriously, when the giant plane struck a light at the end of the runway on take-off. One of the four main landing gears was smashed into the fuselage and pieces of metal pierced the plane's interior, severing one passenger's foot and nearly severing another man's arm. After circling for two hours, dumping fuel, the pilot made a spectacular landing, coming halt in weed-covered space between runways.

MONTREAL, Aug. 1 'NYT',-The presidents of 25 airlines have been called to Montreal Tuesday to try to unenar! what strime officials say is one of the most bitter disputes over transatlantic air fares in history.

Lower-ranking executives of the airlines who have been meeting here since June 29 have been unable to negotiate an agreement setting the price of North Atlantic air fares after next March 1.

Unless the airline chief executives can end the impasse, the fares "could come open" after Feb. 1, according to H. Donald Reynolds, deputy director general of the International Air Trans-

port Association. This means, Mr. Reynolds said, that each airline could sell tickets at whatever prices it wanted to. The result could be a wide-open price war among the airlines, something that has never hap-

Since World War II, virtually (end some Communist) airlines have agreed to charge identical fares for international flights under the auspices of IATA. There are 100 airlines in the organization and they meet

periodically to set the fares. In the conference bere, the 25 airlines that fly scheduled flights between North America and Europe are trying to write an egreement to continue the policy of charging identical fares. But they are widely divided on what the fares should be, largely because of differing philosophies on how to attract passengers away from the nonscheduled airlines that have siphoned off more and more travelers in recent years with charterflight rates ebeut half those of scheduled flights. .

Sources close to the negotiations said that if an agreement was finally reached, two things appeared certain: transatlantle fares generally would not increase

Emergency Cabinet Session

2 Japanese Quit Posts Because of Crash

TOKYO, Aug. 1 (UPI).—Prime Minister Eisaku Sato today summoned his cabinet into emergency session tomorrow to consider the resignations of two defense chiefs over Friday's mid-air collision between a jettiner and an air force jet fighter,

The cabinet was expected to accept the resignations of Keikichi Masuhara, chicf of the Defense Agency, and Yasuhiro Ucda, chief of the Self-Defense Air Force.

Mr. Masuhara submitted his letter of resignation to Mr. Sato today, soon after returning to the Japanese capital from Mo-rioka, scene of the crash.

All 163 persons aboard an All-Nippon Boeing-737 died in the collision with an F-86 jet fighter craft in air corridors over Japan. commercial air corridor,

26,000 feet over the Japanese main island of Honshu. It was history's worst civil-aviation disaster.

The air tragedy was n major blow to the Sato government. It was certain to cause delay of the fourth defense buildup program set to begin in 1972.

The accident also hurt badly the image of the Self-Defense Force, which was having difficulties in regaining respect from the Japanese people since the end of World War II.

Civilian aviation authorities disclosed yesterday that there have been as many as 200 incidents in which Japanese military atteraft have narrowly missed civilian air- tion" before they flew into the

A 'Collective Currency' for Eastern Bloc

Comecon Plan Aired By Czechs' Strougal

By James Feron

PRAGUE, Aug. 6 (NYT).— Czechoslovak Premier Lubomir Strongal has disclosed that the new economic integration plan drafted in Bucharest will include a "collective currency" for Eastern Europe.

It will consist of a "convertible ruble" and new exchange rates, ilnked to the ruble, for national currencies within the Communist bloc. The intention is to simplify monetary dealings, assist regional trade and encourage links with the West.

Mr. Strougal's remarks were contained in an interview published yesterday in Pude Pravo, the Czech Communist party newspaper, after his return from the three-day summit meetmg of Comecon in the Rounanian capital.

Comecon, or the Council for Mutual Economic Assistance epproved a complex and far-resonmg program for East European economic integration at the Eucharest meeting. The program is to be implemented over 15 to

Mr. Strongal's comments, the most authoritative offered so far, indicated that the broad mone-tary and credit reforms of the Bucharest meeting represented one of the basic changes of the

integration program. Convertible He said that the "collective currency of the socialist com-munity will be fulfilled by the convertible ruble and the introduction of economically justified

and mutually agreed rates of

uniform [national] currencies." The national currencies, he said, will be pegged to the "collective currency, to international currencies and to each other." Achievement of this goal would be a major breakthrough, observers here said

Mr. Strongal did not say how Eastern European governments would go about reforming their often chaotic exchange rates, nor thow long it might take to accomplish this Most of the nations in the Soviet bloc have varying official exchange rates for trade, tourism, investment and other ::: PANTDOSES.

It was also unclear how the man the convertible ruble described by Mr. Strongal will differ from the one already in existence. Western - 2 3 firms also avoid dealing with the "transferable roble," as it is

Agnew Reportedly Relayed A Sadat Message to Nixon

By James M. Naughton WASHINGTON, Aug. 1 (NYT). Abba Eban was born in South -Vice-President Agnew reportediy told President Nixon on Wednesday that he had been invited to relay the willingness of President Anwar Sadat of

Egypt to discuss an interim Middle East settlement if the negotiators for Israel were "native Palestinian Jews." Aothoritative administration officials, seeking to demonstrate the substantive nature of the 32-day global goodwill tour the Vice-President completed Wednesday, sald that the information

had been conveyed to Mr. Agney in Kuwait and Saudi Arabia, the pro-Western Arah nations he had visited. The sources said that King Fai.al of Saudi Arabia, who recently visited Cairo, had express-ly mentioned Mosise Dayan, the

Israeli defense minister and a native of British - mandated Palestine, as the sort of Israeli official in whom the Arabs would be willing to place relative coniidencc. "The Vice-President was told which Israeli officials the Arabs feel they can deal with," one

administration official stated. "He was encouraged to relay the advice that the Arabs would prefer to deal with someone born in Palestine rather than European immigrants who are in their view inherently less sensitive to Palestinian problems." Premier Golda Melr was born in the Ukraine and Foreign Minister

One-Day GI Pullout Totals 2,990, Biggest in a Month

American command in South biggest one day pullout of troops in a month. The U.S. troop total now is cut to about 227,000 men. In April, 1969, it peaked at 543,400.

Military spokesmen announced that seven Army units totaling 2,990 men were ordered to stand down, incloding a support batcallon of the 5th Mechanized In-The mechanized pullout left.

Thieu Willing To Goto Hanoi To Negotiate

SAIGON, Aug. 1 (UPI).-President Nguyen Van Thieu said today that he is willing to go to Hanoi to hold peace talks with the Communists or have their representatives come to Saigon. Mr. Thieu said he has repeatedly offered the Communists a cease-fire while peace is discussed.

"I would even go to Hano! or have them come to the palace here for talks. Twe offered them everything. I would even consider having the two parts of Victnam inside the United Na-

North Vietnam is not in the United Nations and South Vietnam has only on unofficial observer there.

Mr. Thieu, speaking to several thousand government information workers in Cholon, said he gets discouraged trying to deal with the Communists.

Candidate .The president, departing some-

what from his usual stand of urging a military victory, spoka off-the-culf for one hour. He is a candidate for re-election to a second four-year term in the Oct. 3 presidential election. As Mr. Thieu spoke, his leading

election opponent, Gen. Duong Van (Big) Minh made his Initial campaign appearance since filing his candidacy July 29. Gen. Minh, leader of the 1963

coup which overthrew the regime of the late President Ngo Dinh Diem, spoke at the dedication of a school clinic in Cholon.

when some 25 Vietnamese and American newsmen and photographers crowded around him as he trocke. He clutched a microphone in both hends and spoke for less than two minutes to an audience of about 150 persons who had helped build the clinic.

He refused to answer newsmen's questions, saying that under the election laws it is illegal to make cial campaign begins Sept. 2.

Sen. Buckley Says Nixon Faces Loss Of Conservatives

WASHINGTON, Aug. 1 (NYT). Sen James L. Buckley warned yesterday that the suspension of support of the Nixon administration by leading conservatives has terious implications" for the President's re-election next year. In a statement that the conservative cenator from New York spent nearly two days drafting and which he has referred to as a "warning signal" to the administration. Sen. Buckley sald that if the concerns of the conservatives are allowed to solidly into open opposition, "it will be vir-tually impossible for the President to regain their credible sup-

Beh Buckley drafted his statement after 11 prominent conservatives, including his brother, William F. Buckley ir., the editor and columnist, and J. Daniel Mahoney, state chairman of the New York Conservative party, announced Wednesday that they had resolved to "suspend" their support of the administration in protest against its foreign

The conservatives said that they do not plan now to cncourage formal opposition to Mr. Mixon's renomination next year, but that they will keep all options open in the light of political deralopments in the next months "

only a handful of troops remaining of a 6.000-man force with tanks and armored personnel carriers which provided primary security on strategic oreas below the Demilitarized Zone.

Spokesmen said earlier that Communist forces Saturday shelled and attacked infantrymen of the Army's Americal division on the northern coast and inflicted the heavlest American combat casualtles in Vietnam in nearly seven weeks.

Three U.S. soldlers were killed and eight wounded in three hours of heavy fighting about 250 miles north-northeast of Saigon, near the old 1st U.S. Marine Division combat base at An Hoa. Com-munist losses in the battle were not known but their positions were raked by helicopter gunship and jet fighter-bomber fire and artillery, military spokesmen sald.

It was the heaviest reported U.S. casualty toll since June 30 when four U.S. soldiers were killed and 19 injured in the explesion of an ammunition truck at a base three miles south of Da Nang near the South China Sea

U.S. B-52 bomber crews flew only a single mission in South Vietnam in the 24 hours ending at noon today, striking a suspected North Victnamese infiltration ronte les than a mile from the DMZ and 14 miles north-northwest of the old Khe Sanh combat base, spokesmen said,

Charge Looting in Cambodia KOMPONG TRABEK, Cambo-

dia, Aug. 1 (Reuters).—South Vietnamese troops operating just inside Cambodia have forced more than 5,000 villagers to flee, a village chief alleged yesterday.

Lt. Non Nnm, chief of this village, said the South Victnamese treated all Cambodian villagers as if they were Viet Cong. The villagers accused the South Vietnamese troops of looting, raping women and stealing gold from their pagodas, he sald.

Commanders of the Sonth Vietnamese Ninth Division, which is conducting a sweeping operation, deny their men have abused the

Young Americans give various saintes after lodging protest at the American Embassy in London yesterday.

Free Speech Abroad Asked By GIs in London Petition

LONDON, Aug. 1 (Reuters).— GIs based in England today handed a 250-signature petition to the American Embassy here calling for a revision of the freespeech amendment to the U.S. Constitution to guarantee freespeech rights for servicemen based overseas.

The amendment would give the right of free specch to forcignbased servicemen, who are now prevented under the U.S. Code of Uniform Milliary Justice from publicly protesting against American government policy.

It was under this code of justice that American Air Force Capt. Thomas Culver was convicted by court-martial at Lakenheath, England, last July 13.

U.S. Will Pay Up to \$11,000 The general appeared startled For Capture of Top Viet Cong

By Alvin Shuster SAIGON, Aug. 1 (NYT).—The top figures in the Viet Cong net-United States and South Viet- work. Until now the usual limit under

nam, have decided to pay tha highest cash rewards of the war —up to the equivalent of \$11,000 -for information leading to the capture of certain key leaders of the Viet Cong's political under-

Informed sources said today that the program, to be financed by the United States, will be tried first as a pilot project in four of South Vietnam's provinces and extended to others later, if successful. It is designed to stimulate interest among South Viatnamese civilians in the lagging program of destroying the Vlet Cong's clandestine organization, which remains a serious threat to the success of the

pacification effort. There is continuing concern among American and South Vietnamese officials that the Communists' subversive apparatus, whose leaders remain elusive, would step up activities after the withdrawal of American troops, restore its hold over many rural eress, and again challenge the stabillty of the Saigon govern-

"It is the cream of the leadership that we are now after with those high rewards," said an of-

The decision to increase the rewards to such high levels reflects the difficulties of the socalled Phoenix program, called Phung Hong by the Vietnamese. The controrersial effort, which critics say puts a heavy emphasis on assassination, often results in the deaths of innocent people. It is often described as one of the most important but least successful pro-

grams in Vietnam. Under the new system, authoritles will offer from a million piasters, or nearly \$3,700, to three million plasters, or nearly \$11,000, to civilians providing information leading to the capture of known tion outside the U.S. Embassy last May 31 and soliciting fellow airmen to take part. About 100 people, including

20 active American servicemen, marched silently from Hyde Park to the embassy in nearby Grosvenor Square.

About 50 policemen kept the marchers in a corner of the square while a six-strong delegation of active servicemen entered the embassy lobby to present the petition. One serviceman-lils military-

style haircut concealed by a wide-brimmed suede hat—said, We believe that only an active protest of this kind will bring any pressure to bear on the Pentagon. The free-speech amendment must be changed." The demonstrator, who was

wearing large sun-glasses to con-ceal his identity, said all 20 servicemen taking part in the march realized they could be prosecuted immediately.

"We figure it's worth it if it results in something being done to allow free expression for servlcemen based in foreign coun-

McGovern Says He Sent Ellsberg To Newspaper

NEW YORK, Aug 1 (AP) .-Sen. George McGovern of South the leader is captured alive, but Dakota says it was he who sug-gested that Daniel Elisberg make the Pentagon Papers available to "a respectable newspaper."

> Sen. McGovern, an announced candidate for the Democratic presidential nomination, is quoted today's edition of Parade, a Sunday newspaper supplement, as saying:

"What happened is that Mr. Ellsberg came to me and told me that such papers existed . . .

"I told him that I felt as a lawmaker that I could not be in the business of breaking the law. but I did make clear to him that thought it would serve the public interest if he made those documents available to a respect-"I think Mr. Ellsberg took the

proper course when he went to The New York Times."

Nixon Refers To China Visit On Iowa Trip

Journey Regarded As Path to Peace

By Keo W. Clawson CENTERVILLE, Iowa, Aug. 1 (WP).—President Nixon told a large friendly crowd here vesierday that his plan to go to. China next year is a key element in realizing a generation of peace. Compling the China visit with the winding down of the Vict-nam war, the President sald that prospects for "our children to enjoy a full generation of peace' are better than at any time since the end of World War II,

As he has done at every op-portunity since he arrived in the nation's heartland Friday night Mr. Nixon emphasized his belief that the China journey is a vital requirement in shaping his vision of a highly competitive, but warless, world of the future.

"You cannot have peace in the world if 800 million of the most creative and resourceful people ... the world are isolated. That why I believe the President should establish new communications with those people so we will have a better chance for

War Briefly Cited In a dam dedication speech yesterday and twice Friday night in Canton, Ohio, the President made only the briefest memion of the war in Southeast Asia. He appeared to put that issue behind him as he focused on the China

visit and even beyond. The Iowa crowd yesterday estimated by state police at 15.000 to 30,000 persons, listened politely to the President's remarks on China, But it warmed considerably when Mr. Nixon stressed his Intention to live without war and also when he emphasized the necessity of rural development in future peaceful competition

with emerging nations.

Mentioning Western Europe. Japan, China and Russia, the President said that the United States would have to develop all of its resources to meet postwar competition or lose its world leadership, "No group can be left out: each person must have a chance to make a contribution so this nation can have the orive. purpose and dedication to retain its leadershlp."

Rural America, he said, must make its contribution with projerts like the new, \$26-million Rathdun Dam, an 11,000-acre reservoir that he helped dedicate yesterday in southern Iowa.

The reservoir, the largest in Iowa, is expected to attract recreation enterprises that will bolster the economy of the region, which has been losing population during the last 20 years. The President was joined by

Gov. Robert Ray of Iowa, a Re-Iowa, at the dedication here. Following the ceremonles, Mr. Nixon returned to Washington to spend the rest of the weekend at Camp David, Md.

Gunfire Wounds Man in Belfast

BELFAST, Ang. 1 (UPI),—A man was shot and wounded in the Crumlin Road area here today. Police sald his condition was "not serious." An army spokesman declined

to identify the man and said "we believe the incident was non-sectarian." The Crumlin Road district has been a crucible of Roman Catholic-Protestant strife. In Londonderry, Northern Ire-

land's second largest city, youths threw four gasoline bombs in hit-and-run attacks on an army observation post overlooking the largely Roman Catholic Bogside area. Another gasoline bomb was thrown at troops patrolling in the Bogside. An army spokesman said the

bombings caused neither casualties nor property damage.

Yesterday, in Belfast, a pipe bomb exploded on the doorstep of a home, blowing in windows and hospitalizing a woman, a police spokesman said.

Thy Rocks and Rilles

The articulate enthusiasm of the previously rather silent astronauts, Scott and Irwin, once they hegan exploring the moon in their Rover, was in large part scientific. To them, the consistency of moon dust, an isolated "frag" of rock, the soft contours of hills and craters, conveyed the excitement of filling new pieces into the jigsaw puzzle of geological evolution, of drawing aside veils that distance had, through eons, kept inviolate from man.

Much of their enthusiasm, however, was that which comes from a first glimpse of any of nature's miracles—Lt. Col. Irwin mentioned Snn Valley; each viewer, sharing the experience through the man-made miracle of television, might fit in his own terrestrial analogue. But it was intensified by a sense of eeriness, an unearthly quality that the Vikinga might have glimpsed in Iceland, or the first Polynesiana to penetrate the crater of Haleakala felt on Maui.

What Scott, Irwin and the television earneras conveyed to earth was a complex aesthetic experience. The astronauts might have heen singing a hymn to the moon: "We love thy rocks and rilles . . . " Only a slight change for the words in the second stanza of "America." made all the more emphatic hy the complete absence of "woods and templed hills." They were there because of an intricate combination of the naked beauty of mathematics and its conversion to tha practical uses of engineering and navigation: thay brought to it the knowledge that can make a grain of dust aignificant and tha sensibility that appreciates the grandeur of the rugged moonscape. Their own courage and skill (and the fortunately petty hut always ominous malfunctions of earth-mads

apparatus emphasized both constantly) were part of a great human drama.

Will that drama ever find artistic expression? In the past, man's journeying to far places inspired many epica, but the genuine axcitement of the voyage was usually expressed in allegory, in fantasy, The Greek wanderings in the Mediterranean. their dangers and beauties, were more memorably recorded in descriptions of Cyclops and Calypso than of the wine-dark sea itself. We know more about Burnt Njal than of the emotions feit by the Iceland farers on their first glimpss of the island's grandly forhidding shores.

Even the far later journeyings of the Renaissance explorers (with the exception of the Lusiads) were chronicled curtly in the pagea compiled by Hakluyt, rather than immortalized by Shakespeare charring that tantalizing hy-product, "The Tempest.") or Racina, Ia there someone who will enlarge upon Norman Mailer and, perhaps with the coonterpoint hetween accurate description and drama employed by Melville in "Moby Dick," fix for future generations the wanderings of man upon the moon?

It is not enough to dismiss the subject with the comment that until man provides a decent dwelling place for those future generations the moon travels are irrelevant. When the Vikings were pushing farthest west, toward Vineland, all of Christianity hrooded over the imminence of the year 1000. and the possible end of the world. Yet the world survived, to cherish the sagas of Eric the Red and Thorfinn Karlsefni. Col. Scott, from the moon, said, as a "fundamental truth"; "Man must explore. And this is exploration at its greatest." It is-and it deserves recognition in art.

Justice's Pale Dawn?

By Joseph Alsop

this was done. Aboard the jet were two Sudanese leaders of the short-lived putsch regime. They were arrested, sent to Khartoum, and promptly executed.

All this has been done with furious determination by a group of Libyan officers who constitute the world's youngest government. Chief of State Moamer Qadhail is only 29. His cleven colleagues on Libya's Revolutionar; Command Council are for the most part even younger. Colonel Qadhafi was born in

1942 near the Gulf of Sirte amid the famous western desert duel between Rommel and Montgemery. He was only six when Israel was created and ten when Nasser took power in Egypt. He and his council are members of a new Arab generation reared on the powerful propaganda of Cal-ro's "Voice of the Arabs" radio,

They are not deeply educated, know little of the outer world and rarely read books. But they are fanatically convinced of the rightness of their cause, which is Arab unity, Israel's destruc-tion, and elimination from the Arah world of all foreign influences, Western oc Eastern, They are extremely puritanical and have eliminated frivolity from the Libyan scene. They are Islamic fundamentalists who believe the answer to all problems can be discovered in the Koran. These young officers overthrew the monarchy two years ago in order to get rld of corrupt people around the King. They regarded Nasser as a father figure and

Colooci Qadhafi considers he has inherited the Egyptian revolutionary's mantle. Tha combination of success, incerity d and innocence about the world

gives Qadhafi, a handsome if austere figure, special arrogance, This mood and the sense of Libra's importance were vastly heightened when France decided tn sell Libya more than a hundred Mirage fighters-although very few have so far been delivered. Psychologically the deal raised Libyan prestige in Arab eyes, and added to an aiready blatant cockiness.

Not Practical

Qadinili believes in a kind of instant unity for the Arabs. He simply cannot understand why other Arab uations don't fail in line. He is convinced that Libyahas ample wealth to attrect sucport, that time is on the side of his youthful regime and that es a kind of nco-Nasser he can drive out foreign influences in the Middle East and North Africa.

whether capitalist or Communist. Thus, he wanted to heip Morocean insurgents to eod corruphopes to neutralize Malta, not in order to replace NATO's presence with a Soviet presence but in order to extrude all non-Mediterrunean powers from the inland sea. Similarly he helped Premier Numeiri and a Soviet threat to take over the Sudan through the iceal Communist party.

This ferveut approach is not however, practical. The Moroccau coup flopped. Malta doesn't want to become a Libyan remit-tance boy but seeks jobs for his dockyard workers, If terms aren't negotiated with NATO, it may feel forced to seek accommoda-Union and serves as willing host to a huge Russian military es-tablishment.

tainly kids himself when he thinks he can squeeze the Russians out of Egypt and other Arab areas. His theory is that when confederation between Libya. Egypt. Syria and perhaps in the end Sudan, becomes opcrable, he can persuada Sadat ta oust the Soviet missions and terminate his treaty. This is very hard to imagine.

It is difficult to confederate the two violently anti-Soviet regimes in Libya and Sudan which favor a military solution with Israel, and Egypt's pro-Russian if anti-Communist regime. which prefers a political solution with Israel. Nor are any answers to problems of this sort contained in the Koran, desuite Quihaff's. Isiamic fundamentalism and nothing, no matter what the curious craving, as it were, to

Nixon and Chou En-Lai

By James Reston

tactics toward the United States are obviously changing, but her strategy and principles remain the same. This is the main impression of a reporter here.

Eleven years ago. Chou En-lai told Edgar Snow, the American journalist: "We believe that a solution to Stno-U.S. relations will ultimately be found, it is only a question of time. But there is one point: If the United States does not give up its policy of aggression and the threat of war against China, no solution is possible. We do not helieve that the people of the United States will allow their government indefinitely to pursue such a policy. There is no conflict of basic interest between the peoples of China and the United States, and frlendship will eventually prevail." Now, while Chairman Mao Tsc-

tuog is making a philosophy of history, it is Chou En-lai who is making history itself, and what he told Snow in 1960 is very similar to what the Western diplomats believe he told Henry Kissinger here the other day: Agreement on principle between Washington and Peking must be

reached first before concrete issues can be settled, and thesa principles, as China sees them, are as follows: First, there are not-

Chinas," but one Chinese government over both the mainland and Talwan, here in Peking.

Second, all disputes between China and the United States, including the dispute over Taiwan, must be settied through peaceful negotiations, without the threat or use of force.

Third, accordingly, Washington must agree to withdraw its armed forces from Taiwan and the Taiwan straits. As to when and how these forces are to be withdrawn, these are matters to he seitled by subsequent negotiation.

An Assumption

It is assumed in the Western diplomatic community in Peking that Mr. Kissinger was anthorized to give assurances to Chou En-lai that President Nixon acecpted these principles, and further assure him that it was the policy of the U.S. government to withdraw all its armed forces from Vietnam.

Otherwise, diplomats here say, Chou En-lai would not have been authorized to invite President Nixon to come to Paking in opposition to strong feelings within the high command of the Chinese Army that no negotiations should take place with Washington so long as American forces remained

Convincing Chou En-iai on the seriousness of Washington's desire

PERING.—China's attitudes and to normalize relations with Peking has not been an easy exercise. Early in the Nixon administration, the French Ambassador in Peking, Etienne Manoel Manach. was instructed by President de Gaulle to tell Chou En-lai that Mr. Nixon had told De Gaulle that he intended to withdraw from Vietnam and re-establish diplomatic relations with China. but the Chinese premier was not

at that time convinced. Since then, however, President Nixon has been faithful to the policy he outlined to De Gaulle. He cancelled most of Washington's restrictions against trade, travel and cultural exchanges with China. He resumed diplomatic talks with Peking's representatives in Warsaw in 1970, and after Mao Tse-tung indicated to Snow that he would welcome personal talks with the President, Mr. Nixon has kept pressing for a summit conference finally through the Kissinger mission.

No Compromise For this, Mr. Nixon has been

generously praised in the Western dinjomatic community in Peking. but now that his visit here has been arranged, even the diplomats who are most enthusiastic about his initiative are asking: Is he really prepared to pay the price? Does he know that China will make absolutely no concessions on Taiwan to get into the United for a peace settlement in Viet-

nam, and oppose violently Mr.

Nixon's policy of increasing Ja-

pan's military role in the defense of the Pacific? In short, the question being asked hy Western diplomats hera is what Mr. Nixon hopes to get out of all this except a relaxation of tension as an argument for.

re-election. For the judgment of wellinformed men in Peking is that China is changing its attitudes and tactics here; not because it needs Washington's support in its quarrels with Moscow, but becauseit wants Taiwan and Taiwan's seat in the United Nations

Agnew in Africa

That President Nixon would send such a rabble-rousing and overs racist as Spiro Agnew on a goodwill missioo to Black Africa is ludierous and beyond bellef. Here is a man who, as-Vice-President, has openly sought and justifiably carned the deep enmity of the vast majority of his own country's black citizens. This mun who beats the bushes stirring up race halred and immenting racial strife with recriminations of his own is in a very poor position indeed to refec to some black Americans as being "querulous."

The leaders of Black Africa should not be taken in by this Bernard Levin is an exception- wolf in sheep's clothing. Ha.

> At home he has sufficiently demonstrated that he is an coemy to all men of color. Abroad, the Vice-President's only saving graca is that he is evidently able to feign tolerance towards those blacks with whom he does not have to share the same continent. RICHARD K. PYLE.

Mansfield Amendment Revised

conference revision of the Mansfield Amendment is that the Congress is not ready to force the President's hand on the specific issue of when American military operations in Indochina ought to end: hence no withdrawal date or limit was set. But the Congress does wish Mr. Nixon to liquidate the direct American military role "at the earliest practicable date" and meanwhile to keep casualties low. To these ends, the President is urged to negotiate a cease-fire. There is nothing in any of these three points, of course, to stop Mr. Nixon from doing just about anything he pleases. The first point gives him generally a free hand. The second merely confirms his own intent-already reflected in the weekly figures-to keep down casualties. And the third point, on the cease-fire, is hollow, since obviously Hanoi will not accept a cease-fire except for a political price which Mr. Nixon has so far been unwilling to pay.

The first message of the Senate-House

If this were the only message of the revised Mansfield Amendment, we would wonder what the point is of going through with it. But there is another message here. For the first time, the entire Congress has gone on record in support of a particular war aim. There is only one reason why the United States ought to stay and fight in Indochina, the conference representatives of hoth chambera have said, and that is to obtain the release of American prisoners. In the revised amendment there is not a word about staying and fighting long enough to give the "South Vietnamese a reasonable chance" to stick in power without direct American propping. This last is Mr. Nixon's own atated war aim and it has now been specifically and deliberately rejected by

Plainly, there is a contradiction hetween the first and second messages of the revised amendment, the first authorizing Mr. Nixon to continue fighting at his own pace and the second telling him that he should linger only to regain the prisoners. If he accepts the license of the first, he risks violating the intent and implicit limit of the second. We have no doubt that this contradiction will express itself in further conflicts between the White House and Capitol Hill. The

tension is bound to sharpen, too, as the Viet Cong's seven points are pressed at Paris. The Viet Cong have offered to phase prisoner release and troop withdrawal, but only if the United States sets a withdrawal

So what difference does it make? Have not the two messages of the revised amendment cancelled each other out, leaving the President under fire but still at the helm of a war policy essentially unchanged? The answer will depend on whether Mr. Nixon chooses to continue regarding Congress as an adversary in war policy, or whether he will relax his hostillty and try to treat it as a potential partner. Certainly he has won his battle to show, in formal terms, that he's the boss. But since the Congress-and according to the polls, the country at large -does not support his apparent objective of seating the Thieu government mora securely, he has won his battle at the expense of some measure of public confidence.

The debate on the Mansfield Amendment has proven, we helieve, that the country aches to get out of Indochina, rejuctant as Congress may be to tangle with the President on operational details. If Mr. Nixon were to read the debate in that fashion, and accept its message, we believe he would find a virtually united Congress and country behind him. Politics lies down the one road, statesmanahip down the other.

We recognize that there remains the possibility of some unexpected turn in Mr. Nixon's approach after the Vletnamese electiona in the fall or as a consequence of his scheduled trip to China by next May. He may be able to consider steps after October that he would not consider before, for fear of jostling President Thieu. And presumably the pressures put on him by his China travel plans will encourage an even faster reduction of the American Vietnam role. Neither of these major events, however, prevents or excuses Mr. Nixon from reaching out to accept the cooperation and support for a shared—and sharply limited—war policy which the Congress has offered him. In respect to Saigon, Hanoi, Peking-and Moscow-alike, Mr. Nixon could only improve his own and the country's position by reciprocating the gesture.

Seventy-Five Years Ago

August 2, 1896

LONDON-Our city is threatened with a new cruzade. Latest among the reformers and purists are the teachers of the terpsichorean art. They insist that vulgarity is slowly but surely creeping into the ballroom, sapping the graces and annihilating the refinements of the dance. One critic says that the figures in modern dance are shurred over or distorted in such a way that what was originally a harmonious procession of movements resolves itself into a disorderly rout.

Fifty Years Ago

Angust 2, 1921

NEW YORK-For the first time in weeks, New Yorkers yesterday were given a respite from the stifling heat. A cool north-west wind bringing the thermometer twenty-two degrees down within the space of twelve hours. At three o'clock in the afternoon it was 84 degrees ?. At three o'clock this morning it was 62 degrees F. Today with a maximum temperature of 70 degrees, the day will be an ideal

Nor is that all, Except in the South, Negro married couples now have 99 percent of the average income of white married couples. Even among married couples in the younger age-group. 20 to 34, the black figure is still 87 percent of the white figure-but here there is some distortion. because more black wives work and earn.

Among these encouraging statistics, there were some that were much less cheering. The average white high school graduate teday still earns almost as much as the average black college graduate. Above all, there was the obvious importance of the remaining spread between white and black average income. Hence no one called for three cheers.

Yet at least one cheer is in order, if you analyze the fore-going figures in the light of the larger American experience. In this larger experience, group ofter for the children of the ghettos,

WASHINGTON-It is bold group has reached these shores, and always, initially taking a much lower economic place than the first comers—of course bor-ring the very first comers, the American Indians.

The ceasus, unfortunately, d.d. not gather the kind of data it now does in the earlier decades of this century. But in 1900, for instance, there must have been a very wide spread between Jewish median income-although there were many very rich Jews already-and average median income of other white Americana

A Contrast

Today, in contrast, it seems probable that Jewish mediati income is at least twice the average wans. The tip-off lies in the simple fact that Jewish-Americans send a percentage of their children through college that is nearly twice the average for other whites.

As late as 1930, again, Dr. Courad Tacuber of the census bureau gives a horseback estimate that median income of Italian-Americans, Polish-Americans and other members of the so-called etimic groups, was quite as far white Americans as black median income was ten years ago.

By now, however, the spread between the so-called ethnic groups and the white Anglo-Saxon Protestant first comers has all hut vanished. More strikingly still, in the short space of 25 years, the Chinese-Americans and Japanese-Americans have cisen so fast that they constitute "elite" groups, for above the WASP average and about on a par with the highly successful Jewish-

Such is the pattern that is needed to fluminate the new census figures on black progress. You must then conclude that this country's black minority has finally been able to toke the road that so many other groups took before them. Already, the figures for three quarters of the country might show the olack minority close to parity with the so-called ethnic groups, if it were not for the tragic weakness of the glietto schools.

Americans.

The schools' failure means that within the black minority, there is yet another minority condenueed to personal failure by deficient education. But that is only another argument for stopping at cost, to secure decent schooling

Provision of Act

The most direct challenge last week-and one that could produce from the Senate Foreign Relatims Committee, which discovered a little-noticed provision in the 1981 Foreign Ald Act. Basically, the provision states that a foreign aid program will be cut off if within 35 days, the executive branch has not supplied by a Congressional committee—or, alternatively, if the President has not invoked executive privilege to keep the document from Con-

By a unanimous vote the committee decided to invoke the provision to require the Defense Department to turn over a fiveyear military assistance plan hich it has refused to supply to the committee. In perhaps the olearest test of the executive

hranch's right to withhold inforministration tussled with Sen. Joseph McCarthy, the Pentagon was thus faced with a choice of turning over the document or facing a suspension of its billion dollar military aid program to more than 40 nations.

The President could invoke executive privilege, but that would set a precedent and undercut all the lesser reasons that the executive branch has been. using for withholding information from Congress—that it would not be in the national interest to release such informaor that the data were "internal working docu-

A Senate Judiciary subcommittee, meanwhile, began hearings on legislation, offered by Sen. J. W. Fulbright, chairman of the Poreign Relations Committee, that would compel government officials to appear before congressional committees and testify unless the President invoked executive privilege. "When the government operates in secrecy, its citizens are not informed and their ignorance breeds oppression, said Sen Sam Ervin of North Carolina, the subcommittee chairman, at the the near pretty well summed up the frustration in the Senate over executive branch secrecy.

Cooper Proposal

In a less punitive manner, Sen. John Sherman Cooper of Kentucky came forward with a proposal that congressional committees. like the executive branch, should be furnished with information by the Central Intelligence Agency, again on the premise that if Congress is to help set foreign policy then it must be informed. Sen. Clifford P. Case of New Jersey and Stuart Symington of Missouri, meanwhile, were pressing amendments that would prevent the President from using undisclosed CIA funds to fight a secret war in

On the theory that the Senate should give advice as well as con-sent, Sen. Vance Hartke advanced with a double-barreled resolution. One part- would call for Senate confirmation of the new United States representative to the Vietnam peace talks in Paris. The other would offer the advice of the Senate that in the negotiations the United States should agree to total troop withdrawal in nine months if agreement was reached on timely release of American prisoners of

The latter part was a variation on the Senate-approved troop withdrawal amendment of Sen. Mike Mansfield, the majority leader, that was still tying up legislation extending the draft. On Friday, House and Senate conferees reached agreement on a compromise that would considerably weaken the force of the Mansfield amendment but would retain the concept that the President should withdraw all troops by a "date certain" subject to the release of American POWs.

All these various legislative strings, even if they should be tied down, would not fundamentally change the balance of power. At most they might make the Congress better informed in giving advice and thus more able

to serve as a counterbalance to the presidency. Undoubtedly the most important string, therefore, was one that senators. Republicans and Democrats alike, were warmaking powers.

In testimony last week before the Senate Foreign Relations Committee, Prof. Alexander M. Bickel of the Yals Law School said: "In matters of war and peace, a succession of presidents -well intentioned and patriotic. to be sure-have indeed come close to canceling the effectiveness of Congress. The result is a dangerous contradiction of the principles of democratic government, which I believe ought to be

War Powers

They were welcome, well-heeded words to members of the Foreign Relations Committee as they set about last week to consider legislation defining and restricting the war powers of the presidency. What is expected to emerge is an amaigam of proposals offered by such unlikely partners in a challenge to the presidency as conservative Sen. John Stennis of Mississippi and liberal Jacob K. Javits of New York. Basically, their proposal is that the President could undertake emergency military actions, such as repelling an attack on United States forces, but could not continue military hostilities for more than a month without obtaining congressional

Even Sen. Hogh Scott, who as Republican leader has stood as the administration's spokesman against congressional intrusions

University.

The view of the black community held by many a social selentist is by now familiar: a disaster area plagued by social disorganization, family disintegration and a host of conditions that breed emotional pathologies. It is a view based, in large meaaure, upon the statistics published periodically by the Bureau of the Census and the Bureau of Labor

By Charles V. Hamilton

Mr. Hamilton is a professor of

INSIGHTS/SIDELIGHTS

Figures

Last week, a new set of figures on American blacks was released -a special study by the federal government entitled "The Social Economic Status of Negroes in the United States, 1970." expected, it painted a somber portrait. But by a coincidence most unexpected, the issuance of the study coincided exactly with the release of another report. this one set forth by the National Urban League at its annual convention in Detroit. And though both studies were based on the same statistics, conclusions drawn by many social scientists and those drawn by the league were worlds apart.

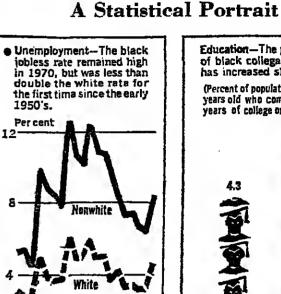

Thus, for example, the gov-ernment study shows that 28.9 percent of black families are headed by females, an increase from 22.4 percent in 1960. The familiar sociological analysis: A significant indication of continuing social deterioration and family instability. The view of the league: The assumption of instability in "matriarchal" households ignores the extended-family adaptation common in the black community—the strong kinship bonds between aunts, uncles and grandparents and the family's children. Some black sociologists go further: they argue that, in fact. roughly 70 percent of these families actually do have a father

Sparring Match

Another example: The government study showed that, in order to obtain and maintain a median family income comparable to that of whites, both the black husband and his wife must-and often do Conventional Wisdom holds that this is a negative fact. since it is claimed that such families tend to be less stable than those in which the father is the sole breadwinner. But many black social scientists deny the claim, citing the prevalence of the extended-family adaptation—and they see the fact not And he might add that these as an indication of family deterioration but as proof of an attitude of cooperativeness, and strong work orientation in these

Sometimes the different ap-

proaches to statistics partake of a sparring match. Thus, one social scientist may point to ilgures that clearly show that, in 1970, black persons 14 to 19 years of age were more likely to be high school drop-outs than were for many black sociologists, the white persons in that age group. But another sociologist will counter with data showing that, since 1964, the number of blacks going to college has more than doubled, from 234,000 to 522,000. of whites and blacks alike. new students are mostly the first generation of their families to attend college, indicating a strong

achievement. On the face of it, these argu-

and increasing orientation toward

ments, among social scientists over statistics that, by and large, both stdes accept may seem to be nothing more than an exercise in academic semantics. But for the Urban League leadership, and issue has far greater importance. The manner in which thesa figures are interpreted, they feel, serves to delineate and identify the black community—in the eyes

Statistics, heedlessly broadcast, ere dangerous. And the customary negative interpretations reinforce negative generalizations, ignoring the actual and potential strengths of the black com-

Ceausescu's 17 Points: A New Puritanical Code

By Dan Morgan

BUCHAREST (WP) -The overworked description of Romania as a Communist country that is "liberal" in foreign policy but orthodox domestically was validated with dramatic suddenness here last month.

Pushed through by President Micolae Ceausescu while the cheers were still ecboing from his bold journey to China, North Kores and North Vietnam in June, a puritanical new code of sultural and ideological conduct has abruptly cut short a period of relative permissiveness.

While messages of support pour in from provincial party organizations, the daily fare of Western beat music on the radio has been all but stopped.

Western films and the American crimebusting series "The Untouchables" have been dropped from television in response to the president's plea for less violent, "noxious" programs. And the agent for several British rock groups who arrived here in the thick of the excitement returned home without signing a single

contract. Romanian journalists say that more articles are being rejected for publication than usual, betause government officials lack guidelines for interpreting the

new policy. Barsh as the new policy seems to some, it is fairly consistent with the one that has been followed by Romania ever since 1965. That formula has been to balance an independent foreign policy with a tight rein on the

17 Points

Many foreign and Romanian observers think the "17 points" laid down by President Cean-sescu on July 6 are a statement of foreign policy to strengthen Romania against Soviet pressure. Criticism of the government by the Soviet Union and its allies came into the open after Mr. Conneccu's visit to China. Ro-

manians say the 17 points would be equally acceptable in Moscow, Peking or East Berlin. As such the policy is documented proof of Romanian conformity and reliability, and intellectuals appear ready to accept this argument.

However, there has been no statement or even clear hint that foreign policy considerations alone prompted the new line. And well-placed Romanians say that other important factors are involved. One probably was Mr. Ceausescu's desire to assert his leadership dramatically at a time when criticism had begun to be heard against his domestic programs both from conservative bureaucrata and moderates, and when some had been voicing fear that the China trip had been too much of a risk.

Another factor may have been the leadership's genuine conviction that decadent influences from the West, and slackness in the party itself, had begun to loosen orthodox seams of Rumanian society.

The mass meeting at which Mr. Ceausescu followed up his policy code with a long speech to virtually everybody of any importance in Romanian political, economic and cultural life was described as acrimonius. Large parts of it were omitted from press accounts of the meeting.

There was open criticism by party officials of rising criminality, admissions of poor morale among workers, and rehukes against vouthful vagabonds who rough up people on the street. It was also noted that venereal disease, particularly among young people, was once again on the rise, after being wiped out in 1949.

The principal target of Mr. Ceausescu's 17 points was Romanian youth. They declared that tendencies toward "parasitism" and an "easy-going life without work" will be combatted; that alcohol will be forbidden in youth clubs and that in youth clubs and that "atheistic propaganda" will be etrengthened to fight "mysticism"

Radio and television programs

will be improved and programs cultivating the "spirit of violence, the bourgeois way of life and a mentality noxious to youth education" will be stopped. foreign musical repertory will be "screened to avoid musical pieces

expressing decadent currents."

Romanian secondary and high school students already donate from four to six hours work a week to state projects and sources said this week that this would almost certainly be increased now. ment announced that party officials will be sent to political refresher courses and that tough ideological criteria will be applied in book publishing houses,

Conflicts

theaters, even factories.

Western diplomats find conflicting elements in the events surrounding the regime's ideological and cultural counterat-

While several conservatives have been fired. Education Minister Mircea Malita, who has a reputation as a "modernist" has en kept on even though his ministry has been singled out for special criticism. Dmitri Popescu, a close associate of Mr. Ceausescu who is described as a middle of the roader, was named head of the state committee for art and culture while retaining his party post as cul-

Books on impressionist painting are still on sale at some select bookstores. Moreover, there has as yet been no noticeable change the overall atmosphere of Mr. Ceausescu's Romania, which has done away with such things as political arrests and has permitted Romanians limited contacts with foreigners.

Romanian officials have been emphasizing to foreigners that the cultural policy announcement is to have no effect on the Western economic contacts and

Party intellectuals insist that the new policy is a sincere reaponse to certain negative facts of Romanian life. Westerners confirm that petty

erime also seems to be on the rise, end earlier this year. Romanians were shocked by a mass murder in which the culprit killed five girls and dis-membered their bodies. The suspect is awaiting trial. Ouilty verdicts were handed down against provincial officials who were said to have embezzied millions of lei (18 to the dollar) from the state. The sentence was

As elsewhere in Eastern Europe, American pop culture has a strong appeal to youth. One young man selling pottery gave a Western visitor some of his wares in exchange for a promise to send him a pair of American levis. Last year the pop group Blood. Sweat and Tears received a tumultuous welcome in Romania, though entertainers had to abide by a promise not to "wiggle."

American diplomats the mselves complain that the Office for Film Distribution often selects the poorest American films and serials because they are cheapest. On the other hand, Romanian officials have also rejected such quality films as "Easy Rider" and "Midnight Cowboy," and the pacifist film "M"A*S"H" was turned down because it purportedly glorified violence.

Sources in the cultural world do not interpret the recent tightening as directed against Western culture however, but against bad work. They are therefore hopeful that the American play "Enemy of the People" by Arthur Miller will be produced as planned at the national theater this fall.

Writers

These sources say that the policy shift was squarely aimed at Romanian writers who copy Western styles without understanding them. Plays such as Josif Naghiu's "The Dark," Josif Naghin's which had a one-day run in the spring, have been sharply attacked for portraying intellectuals and authorities alike in a bad light—and clumsily. The pley portrayed a bumbling professor trying to get the police to evict two young vagabonds who had invaded his home.

He went on to charge that while American writers and intellectuals may have more freedom than in Romania, they also have less sense of participating in political and social life.

'Freedom is something you have to look at very closely." he said. "From a distance you may see two birds jumping. One is jumping higher and you assume it is freer. But then you go closer and you see that that bird is in a cage and it is jumping only when the man who is holding the eage pulls it.

"The other bird is doing less if it jumps too much the man

THELONG WEEKENDS **CRUISE TO NEW YORK** FROM APRIL 30

Every week till early November those great European pleasure islands Le France and QE2, slip out of Le Havre and Southampton for New York. You'll have five blissful days before you hit the big city again. Five days of truly sensational food and comfort, action or inaction, entertainment or solitude—whichever you wish.

You can fly anywhere, you'll go rarely on a great liner in your life. Now they go where you're going every week, regular as clockwork. The best bit of teamwork since the Entente Cordiale.

Seize the opportunity. The next long weekend is on Le France sailing from Le Havre and Southampton on Friday, August 6th.

The two best ways home. One leaves every week.

bankers say, is fueled by a desire

to be in a "strong" currency. It

is no surprise then that under-

writers label Imperial Chemical

Industries' sterling-DM issue an

"outstanding" success. Terms on

the £15 million, 8 percent offer-

The economic news emanating

from the United States last week

rekindled concern about the value

of the dollar. This, coupled with

fears that the Treasury would

cease exchanging its depleted gold hoard for dollars held by of-

ficial foreign institutions put the

price of gold on the free market

Under this combination, the

price of dollar Eurobonds sagged

half a point, on average, for the

week on the secondary market

from the depressed levels of a

week ago. The sharp drop on

Wall Street added further pres-

sure on the price of convertibles.

Nevertheless, there is still room for new dollar issues. Airlease

International's \$20 million, 9

percent, 15-year bonds and \$15

million, 8 1/2 percent, 5-year

notes (both guaranteed by foor leading U.K. banks), were priced

The \$25 million convertible from

Beatrice Foods was priced over

the weekend at par with a 6 1/4

percent coupon and a conversion

premium of 8.93 percent over

Friday's closing New York Stock Exchange price of Beatrice, There

had been some speculation that

a higher coupon would be needed

to make the issue go, but under-

writers said it was beavily over-

subscribed as is. A minor con-

cession was made in the conver-

sion premium, which was original-

ly targeted for 10 percent. The

bonds are convertible at \$45.75

Elsewhere in the market, the

to a two-year peak.

ing, will be get later this week.

Eurobonds

By Carl Gewirtz

PARIS, Aug. 1 (1HT).—The myth of August (nothing happens with everybody on vacation) having been shattered two years ago with the unexpected devaluation of the French franc, there is a widespread feeling that a number of currencies will be redefined this month.

Page 8

The leading candidate, of course, is the deutsche mark, expected to be revalued around 7 percent over the previous 3.66 to the dollar in line with the size of the recent Swiss revaluation. The last time the mark was revalued, the market for DM-denominated Eurobonds disappeared as bond holders eager to seli and take profits could find no buyers and were locked into position for longer than they anticipated. Thus, it would be expected that holders of DM bonds would be sellers now, buying dollars at very favorable rates and moving into high-quality, high-

yielding dollar bonds. But despite the experience of 1969 and despite the fact that there is little quick profit to be made on the anticipated revaluation by moving into DM at this point, demand for DM bonds is extremely strong.

The Province of Newfoundland's 80 million DM, 8 percent offering, which was expected to be priced at 98, came out at 98 1/2 and immediately moved to a premium of 100 1/4 on the secondary market.

Responding to the pickup in demand, German banking authorities approved two new issues of 100 million DM each from the City of Yokohama and Quebec Hydroelectric, Pricing on the Yokohama bond is expected to be at 99 1/2 with a coupon of 8 per-

The interest in DM bonds,

Dow Jones Average Drops 30 Points in Week As Pessimism Over the U.S. Economy Grows

By Thomas E. Mullaney NEW YORK, Aug. 1 (NYT) .-While optimism on the state of the economy continues to be the watchword in Washington, the mood elsewhere has been quite different. As the year rolls along. a diminishing level of confidence is obviously developing in busi-ness, economic and investment

In recent weeks particularly, a wave of pessimism has engulfed Wall Street—and it may be encompassing Main Street se well. It is being reflected in a sagging stock market and the cautious commitments of both consumers and business

Security analysts and other commentators said that the growing malgise over the nation's mammoth economic problems and the administration's domestic policies was responsible for the precipitous decline in the stock market last week. The leading etock averages suffered their greatest drop in more than a year, with the Dow-Jones industrial index down almost 30 points.

Although investor sentiment is preponderantly bearish at the moment, no panicky activity was in evidence and there were virtnally no fears that the stock market was facing a rout such as occurred in 1969-1970, when the averages dropped 36 percent in 18 months.

At the moment, though, top government officials are adhering to the party line, passing out reassuring statements with every disappointing development and letting it be known that the White House is unset with the storm signals being raised with increasing concern by such au-thorities as Arthur F. Burns,

The financial markets were beset last week by a series of adverse developments, including: • The continuance of great tension in various labor negotia-

• The 50 percent cut in the dividend of the United States Steel Corp.

 Unfavorable economic statistics, particularly the data on the leading economic indicators and the United States' foreign trade

 The disclosure that the federal deficit in the fiscal year that just ended had reached \$23.24 billion, up from \$2.85 billion the

War II. • The sharp upward move of gold prices and weakening of the dollar as this nation reported another drop in its gold reserves in June.

All of the economic news this week was not bitter, however. There was reason for encouragement in the latest report on machine-tool orders, which were up about 23 percent in June; in the disclosure that contracts for future construction had risen 22 percent in June; in the data that showed total retail sales increasing by 8 percent during the latest week, and in the generally

chairman of the Federal Reserve year before and the second great favorable tenor of second Board.

Board. est red-ink figure since World ter corporate exercings. ter corporate stantage.

The profits profits was par-ticularly assistactory. With Chaeral Motors rolling up a substan-tial 20 percent gain for the June quarter, United States Steel achieving a 98 percent improvement and a wide range of

other notable gains, the oversit

showing was quite favorable. In a broad tabulation of some 1,200 companies by the First National City Bank of New York, the second-quarter profits aggregated \$7.2 billion after taxes up 11 percent from the same

quarter in 1970. Unlike the stock market, however, the bond market did not move dramatically this week Prices changed little and trading activity in general was quiet

The bond market's stability was caused partly by the Trea-sury's refinancing of \$5.1 billion of maturing bonds and notes: All of the leading etock averages sustained deep losses last week as the market declined on a broad front in relatively moderate trading. The drop was the sharpest since the week ended

June 27, 1970. The bellwether Dow Jones in dustrial stock index fell 2935 points to 858.43. It thus retreated more than 32 points for the month of July, reducing the net gain for the year to 19.51 points. The Standard & Poor's 508etock index backtracked 8.36 to 95.58 and the New York Stock Exchange composite was down

2.01 to 52.81. The week's turnover on the Big Board increased to 62.9 million shares from 60.8 million the

Amex and Over-Counter

NEW YORK, Aug. 1 (NYT)—Stock prices on the American Stock Exchange finished last week moving in the same direction they began the week—on the downside. The index closed at 24.81, down .83 for the week, which is considered a sizable decline. Volume ran higher than the previous week-15,874,765 shares

compared with 14,147,900. The downtrend in stock prices was also noticeable in the overthe-counter market.

Trade in industrials was described as "moderate to light," with a few issues showing some sharp losses and most having at least fractional declines for the week. Among bank stocks, the decline was not quite so apparent. Many

mained unchanged for the week. However, State Street Boston Financial was down about 2, and Citizens & Southern was down 1, as was Bay State Corp. Brokers reported quite sharp breaks for insurance company

stocks which showed declines "across the board."

American Insurance Group lost 2 and so did Capital Holding

and Liberty National Colonial Penn Group and Connecticut General each lost 1 point. Kemperco Inc. was a substantial loser with a 4-point loss, while the St. Paul Group dropped 3 points, Monarch Capital bucked the trend, showing a rise of 2 points, and so did Crum & Forster, which moved up a point.

Okker Eliminates Lutz, Gains Final With Laver

QUEBEC, Aug. 1 (UPI).-Tom Okker of the Netherlands outlasted Bob Lutz of Los Angeles, 6-3, 3-6, 7-5, yesterday to move into the singles final of the \$50,000 Quabec international tennis tournament against Rod laver.

Okker broke the Californian's service in the 12th game of the third set, taking match point on a double fault.

Laver of Australia, seeded second, eliminated Cliff Drysdale of South Africa, 6-3, 7-6,

Laver broke Drysdale's service in the fourth game of the first set. In the second set, they battled to 6-6 as each player had his serve broken twice. Drysdale took a 4-2 lead in the seven-point tiebreaker, but Laver scored five straight points to win the match. Laver gained the semifinals with a 3-6, 7-6, 7-6 victory over countryman Roy Emerson and Drysdale had eliminated Ray Ruffels of Australia, 6-2, 6-2.

Gorman Meets Connors

COLUMBUS, Ohio, Aug. 1 (UPI).—Tom Gorman of Seattle and Jim Connors of Belleville, Ill., advanced to the final of the \$20,000 Buckeye tennis champion-

ships yesterday. Gorman eliminated Ray Moore of South Africa, 6-2, 7-5, and Connors defeated Erik Van Dillen of San Mateo, Calif., 6-4, 6-1. Van Dillep had gained the semi-

Open tennis championships to-Wimbledon champion Evonne Goolagong of Australia won the women's singles with an 8-6, 6-3 victory over Sweden's Christins Sandberg.

Battrick had advanced past Ian Fletcher of Australia, 6-3. 6-3. 6-3, in the semifinals and Case had eliminated Jun Kamiwazumi of Japan, 5-7, 3-6, 6-3,

The Scoreboard

TENNIS—A: Porin Alegre, Brazil. Brazil won both marches in the opening round of the Inter-Zone Davis Copsemifinals against Czecheslovatkio. Edson Maodarino defealed Jan Kodes, 8-0, 6-4, 4-8, 8-4, 8nd Tomas Koch desied Fracticek Poia, 6-4, 6-4, 0-2, BASEBALL—At Tnipel, Tajwan bent Japan, 5-0, to win the Far East Little League World Series and gain a berth in the World Series and gain a berth in the World Series at Williamsport, Pn.

THOROUGHBEED RACING-At Ar-THO SOUGHBEED RACING—At Arlington Heights, El., Bold Reason firmity established himself as the best 3-year-old turf runner in the Onited States by ripping off his fifth consecutive victory, in the \$138.200 American Derby at Arlington Park. The son of Bell to Reason out of Lairn, by Djeddah—a half-brother to Never Bend—scored by n half-leogth over Mr. Pow Wow, Bold Reason paid II to 16 ns the favorite He carried high weight of 124 pounds, was ridden by Laifit Pincey ir, and earned \$81.950 for owner William Levin, a New York textile manufacturer and occasional film producer

itim producer
EOMING—At Monterrey, Mexico,
world welterweight champion Jowe
Napoles stopped David Melendez of
Fuerio Rico in the lifth round of a

EMPLOYS A

BRIDGE_

The two teams in a recent New York contest bid similarly on the diagramed deal, but the result was a 13-point gain for one of them. At both tables, South opened one no-trump and North settled in three no-trump after using Stayman to explore the possibility of a spade fit.

Both West players led the

heart three, and dummy's ten

South then made the normal play of developing diamonds, leading low to his jack. East won the second round with the ace and cleared the hearts. South decided that his best chance was to play East for both missing spade honors. He therefore won the third round of diamonds in dummy, preserving the two in his own hand for entry purposes, and led to the spade ten. When this lost to the jack,

he was two down. The defenders took three heart tricks and a trick in each of the other suits, As it happens, the contract could still have been made after the heart ace had been driven out. If all the diamonds had been cashed. West would have been in trouble. His last discard would have to be either a spade, giving South three tricks in that suit by finessing the queen, or a heart permitting clubs to be played

safely. In the replay, South made the fine play of a club at the second trick. He was unlikely to acrive at nine tricks without making at least one in clubs, and he reason-ed that if East held the club ace, he would probably duck, and that if West held the ace, he could rdly be sure that a heart continuation would be safe from his

This maneuver succeeded in its aim, for West refused to take the club ace. With one club trick in his pocket, South shifted to dia-

monds and eventually finessed the spade queen to make nine

It is hard for West to know whether his partner began with two hearts or three. If three, he can afford to win the club lead and continue hearts. In the first room, the same club maneuver would probably have falled be-cause East had dropped the heart six on the first trick to signal

REGULATING THE POOR The Functions of Public Welfare By Frances Fox Piven and Richard A. Cloward. Punther Books, 389 np. \$10.

Reviewed by Roger Jellinek

RANCES Fox Piven and Richard A. Cloward have written an irritating yet profoundly interesting book on welfare, an achievement, considering the guilt and sourness of the reality and the usual tedium of its literature. Poor relief, the authors suggest, is not systematic charity but systemic sanitation, clearing up the noisome statistical debris of recurring economic crises. Miss Piven, a political scientist and urban planner, and Mr. Cloward, a sociologist and social worker (they both teach at the Columbia School of Social Work), take the Marxist view of capitalist society in which the poor are the inev-itable victims caught in the matrix of blind technological cataclysms and venal regulation by political and economic institutions. Each capitalist crisis, they argue, is resolved at the expense of and with the use of the poor. Historically, they say, there is a cycle of poor relief: massive dislocation, massive discontent, direct relief, work relief, end of massive relief. In the temporary stability that follows, the relief system becomes a psychological and social threat that keeps the poor at work in a marginal labor

That their theory is wretched-ly simplistic is, luckily, demonstrated by the authors themselves. For example, between 1948 and 1960, one million farms disappeared. Twenty million people, mostly blacks from the South, left the land for the cities, mainly in the North, Thus, to bolster their relief-cycle theory, the authors would have been obliged to show that the drastic increase in the welfare rolls in the '60s was because this flood of people became eligible.

But Piven and Cloward show that most of the migration had already taken place in the previous decade, and that while benefit levels rose by 50 percent in that period, the number of re-cipients rose by only 17 percent (in the South, they actually declined, in some cities by half), whereas in the '60s, when benefit levels rose only 30 percent, the number of recipients surged by almost 100 percent. Furthermore, relief rose most sharply after 1964-at a time of the lowest peacetime unemployment and the greatest economic expansion on record. Why then was there no violent demand for relief in the '50s, as the authors' theory would suggest, and why did relief ex-pand so suddenly in the '60s when their theory would suggest the opposite? Despite their theory, the authors answer this question brilliartly.

The '50s was a period of ideo-Memories of the Depression were still vivid. Rural blacks had no political know-row. In discussing why they find that relief practice has been more restrictive even than relief law, the authors write that "the great majority of Americans, although they have no direct economic stake in the relief system, despise it... The relief agency is their whipping boy; it marks and makes visible the dependent poor, and is made

to blame for the existence. these poor." This has made rel administrators nervous, and self-defense, they have devel an adversary relationship their clients

The authors give a devadescription of the routine deg dation of welfare applicant who in turn tend to accept same implied evaluation of the selves. Until quite recently to the rarely appealed decisions may be about them out of a well a population of 1.5 million in Mylin York City in 1984 there were on a 15 appeals, and in 1968 still of poor eligible for wage subsidies class and d them.

The explanation of how situation was radically cha is the most novel and value contribution of the book. makes it indispensable for und standing the domestic politics but the '60s. In their account of 1 2 1000 relief cycle of the 30s the soft concede that FDR's most were governed as much by building of the New Deal on the tion as by any amiles, and rebellion. Similarly the Kennes and Johnson administrative were looking for a way to sestablish that coalition three ened as it was by a South a raged by civil-rights pressure by the decaying cities whill white ethnic machines and black claims against urban

newal. The Democrats had open find a way of enlisting the fine without alienating the white. The Great Society anti-pove of program was the result Cant s program was the result. Cand's suitaing on urban unrest, the John Demoison administration bypassed the community action program the community action program to directly funded a parallel gift the politics. The softest accessors patronage was welfare—the United the politics. The softest accessors patronage was welfare—the United cheaper than housing, a partonage was welfare—the United cheaper than housing, a partonage was welfare—the United cheaper than housing, a patronage was welfare—the United cheaper than housing, a patronage was welfare—the United the John bureaucratic expert to the fare administration. In two partonages and the Office of Economic Opportunity spent \$85 million in the transcription with the result that the courts struck down one well accounts the partonage of the pa restriction after another. Wel rights organizations followed

rights organisations followed In 1968 alone New York Carl III forced to spend several hom million dollars on winter cloth for recipients who had never fore claimed it. fore claimed it.

Why, then, given this for,
dably convincing interpretages
of the welfare explosion, do authors feel the need to ref poor relief cycle? They have be and la leading advocates of welf is a s. want to see the rolls tripled by after politicizing welfare in terms regued rights they hope to cause a "s Tan co tems-break" and a re-evalual

of the poor as people, not the mampio The authors want a predicted total history on their side. But, as its then to have so ably demonstrated, but bet face of theories, history is relail is hole. citrant, fd moring

miler closed with a sprint in the tast 100 meters and won his qualifying heat for the 1,500meter final Liquori ran 3 minutes 493 seconds, the equivalent

Wearing red, white and blue for the first time in his colorful track and field career, Dr. Deland Meriwether also survived his first heat in the 100-meter dash. It was a significant, satisfying victory for Shorter, the former Yale University student who once said that all he ever managed in races as a collegian were sunnerup performances . The Record

In recording a clocking of 28

minutes 50.8 seconds, Shorter, who now lives in Gainesville, Fla., shattered the Pan-Am record by almost 27 seconds. Juan Martinez of Mexico, the

fourth-place finisher of the 1968 Olympics, outkicked the crowd favorite, Mejia, for second place in 29:05, also under the record. Mejia, cheered enthusiastically by the crowd for the first three miles until Shorter picked up the pace, held on for the bronze medal, over Gary Bjorklund, the Minnesota collegian.

Women Gymnasis

U.S. women gymnasts filled the top two places and the United States led the overall team standings after the completion of the compulsory exercises.

Gymnasts from six nations are taking part but only Canada and Cuba could keep pace. The Unit-ed States ended the day with 180.20 points, Canada with 177.30 and Cuba 174.30. Linda Jo Metheney, winner of

the individual race with 36.70 points. She is a University of a free agent's But Thomas made Illinois graduate from Tuscola, Ill. a total of about \$60,000, mostly

thrilled thousands of fans with his remarkable run-for-fun success story, finished second in his heat of the 100-meter dash, be-hind Pablo Montes of Cuba, the fourth-place finisher at the 1968 Olympics.

Few in the crowd of 50,000 in Pascual Guerrero Stadium recognized Meriwether as anything other than an American when be stepped to the starting line in the first of four trial heats, Semifinal Field

Besides Montes, who clocked a comfortable 10.3 seconds (Meriwether ran 10.4), the semifinal field will include Donald Quarrie and Lennox Miller of Jamaica.

Quarrie looked especially strong en route to a victory in 10.1 during his heat, accelerating smoothly past Hermes Ramirez of Cuba and Albert Sonds, a Bahamian, in tha last 20 meters. Miller, the 1968 silver medalist

in Mexico City, took his heat in 10.2. Jim Green, Merwether's teammate, also won, in 10.5, but wore an elastic bandage on his left icg and seemed to be favoring a tender thigh muscle, particularly in the last 10 meters. Matzdorf showed the tiring ef-

fects of the last few days. He cleared jumps at 6-6 3/4, 8-8 3/4 and 6-10 3/4 on his first attempts—which ultimately proved his margin of victory over Wed-

No Spring But the spring and speed that characterized his world-record performance in Berkeley, Calif., and a subsequent 7-4 at Durham, N. C., two weeks ago, clearly were missing. Matzdorf was too ill to attend the award ceremonies, and Jim Crawford, a qualifier in the 1,500-meter run, stood in for the Sheboygan, Wis., athlete on tha

victory stand. Liquori, the Cedar Grove, N. J., Olympian, ran from the back of the pack. At one stage, he was more than 50 meters behind Rodolfo Martinez, a Mexican, who appeared to be running a pace for the half-mile instead of the metric mile.

Liquori closed gradually and reached second place at the top of the last turn. He could have settled for a comfortable spot in the final with the second-place finish, but, as if to prove to Martinez that he would not be intimidated by rabbit tactics, Liquori sprinted and strained at the wire to beat his rival.

The United States appears headed for more medals in the 400-meter dash, as John Smith, the world record-bolder at 440 hitter to give the United States yerds, and Fred Newhouse reach-

RUSHING PASSER—Quarterback Dan Pastorini of Santa Clara and the College All-Stars is hit by Colts' Charlie Stukes and Bill Laskey in Baltimore's 24-17 victory.

Blanton Collier.

CHICAGO, Aug. 1 (NYT).— Earl Morrall, the 37-year-old quarterback who was a College All-Star back in 1956, threw three touchdown passes Friday night to help the Baltimore Colts, the National Pootball League champions, beat the current edition of the All-Stars, 24-17. before 52,289 fans at Soldier

Morall completed 20 of 30 pass attempts for 329 yards, but the All-Stars gave the professionals real workout, Morrall was dropped for losses five times as the collegians did a commendable job defensively.

But their offense could not move in the second half following a first-quarter touchdown drive. John Brockington scored for the All-Stars on a sweep from the Colt 1-yard line following a pass-interference penalty against Baltimore. The second All-Star touch-

down came late in the gama when Jack Ham, the linebacker from Penn State, recovered a

Cowboys Unload Thomas

CANTON, Ohio, Aug. 1 (NYT). -The New England Patriots completed a trade with Dallas. yesterday - that - brought them Duane Thomas, an angry holdout but an excellent running back. In exchange, the Conboys received the Patriots' first draft choice in 1972.

The Patriots also sent Carl Garrett, their regular halfback, to the Cowboys. They received in return Halvor Hagen, a promising offensive lineman who was not able to crack tha Dallas starting line-up, and Honor Jackson, a rookie wide receiver.

Thomas, the National Conference Rookle of the Year last season, had refused to report to the Cowboy training camp be-cause of a salary dispute. Ten days ago at a news conference, Thomas called Schramm "de-ceitful," Gli Brandt, the Cowboy personnel director, "a Har." and Tom Landry, the coach, "a plastic man."

Thomas was paid a low base five gold medals at the last salary last year at the start of games in Winnipeg in 1967, led a three-year contract, a salary said to be equivalent to that of

because he signed bonus and incentive clauses. Thomas will team with Jim Nance in the New England backfield to help compose a formidable rushing duo. Hagen will likely be a regular guard.

The first draft choice that went to Dallas belonged originally to the Los Angeles Rams It went to New England in compensation for Phil Olsen, who played out his option with the Patrlots and signed with the Rams.

Patriots' general manager Upton Bell completed another deal. sending John (Bull) Bramlett, a seasoned linebacker, to Green Bay for Rich Moore, the Packfirst draft choice two years ago. Moore is a 275-pound de-fensive tackle who was demoted last season from regular status and ahifted to offense.

FOOTBALL TRANSACTIONS CHIEFS—Kanbas City obtained tight end Earl Wess from the Bears for an ondisclosed draft choice.

SAUNTS — Now Orleans traded offensive and Inog Moore and an undisclosed draft choice. LIONS—Detroit running hack Mel Parr coded a 13-day holdout by signing a three-year contract for an undisclosed amount.

a 17-6 exhibition victory over the Houston Oilers in the annual pro football Hall of Fame game. Rookie Lynn Dickey of Kansas State threw a 49-yard touchdown pass to Charlie Joiner for Houston. Walton tossed a nine-yard scoring pass to veteran Bob Klein and a 33-yard scoring aerial to rookie Randy Vataha, who was Jim Plunkett's favorite target at Stanford.

Observer

Inscrutable Occident

By Russell Baker

WASHINGTON.—While President Nixon's dramatic announcement that he will visit America sometime next year is still reverberating happily through

world of ours, the intricate staff work which must precede any such historic presidential mission is already well advanced at the White House. In undertaking his journey 🕾

America. the President was well aware that he would be severely hampered by the lack of a large corps of government experts deeply familiar with this immense and baffling country. We once had such a group of men, known on the Washington cliche circuit an "Old America Hands," hut they were forced into early retirement years ago because their information too frequently failed to he the information Presidents wanted to hear.

Accordingly, with characteristic unpredictability. Nixon has told Professor Kissinger to assemble a group of new Old America Several bundred have already been rounded up, ilnger-printed and sent to Attorney General John Mitchell for what is known on the police cliche cir-cuit ss "security checks," or, as we say in the mother tongue, to make sure they're not the kind of people apt to tell the President anything he doesn't already be-

While waiting for this crop of experts, the White House staff planners are wrestling with a host of incredibly complex questions about Nixou's bost country.

Is there, for example, really a Hoboken? Is New Jersey, in fact. real? Or, as seems more likely, is it merely another of those elaborate spoofs which so delight the American's devious Occidental mind with its taste for grotesque humor?

Nixon danced a Romanian folk dance in a public square in Bucharest with an official. Logically, it would seem correct. upon visiting New York, for him to dance the boogaloo with Mayor Lindsay in Central Park. But is

While such questions are vital to preserving presidential "face." they have no great political import. The more difficult problem for the President will be to get behind the facades and showcases which will inevitably be presented to him as "the real America" and to find out for himself what conditions are truly

American mainland.

White House advisers are already turning down incoming proposals which they believe are designed to give Nixon a mislead-ing idea of life in America. One plan, which they have vetoed, called for the President, while visiting Washington, D. C., to travel hy bus during the rush hour from the White House to Anacostia, with no special as-

like on that sprawling North

The Idea was rejected on the ground that it would give the President a distorted idea of how people are moved to and from work in the American capital. White House staff men with personal experience of Washington insist that workers there

sistants or body guards to help

usually travel by chanffenred car. At Vice-President Agnew's suggestlon, the White Eouse has also asked the Americans if the President may tour one of their notorious northeastern com-munications centers and observe the workers at their task of distorting the news.

No reply has yet been received to this request. If one is, White House aides say, the President will not base any sight-seeing plans on it, because it is bound to be deliberately misleading.

White House aides are often asked. "Do these exotic presi-dential travels really do any "Yes," they always say, since they are not pald large salaries to tell the public that the President is wasting his time.

The fact, however, is that no President these days can visit America successfully until he is out of office. This suggests a useful amendment to the Constitution. In addition to the President who visits around the world. it might give us another governing gentleman, only slightly less exalted, who would be compelled by law to take the bus—on rainy days, a taxi—between his home and the White House,

New Brain Drain: From U.S. to W. Germany

By John M. Goshko

HAMBURG, Aug. 1 (WP).— The 92 men, women and children disembarking from a chartered jetliner here Thursday morning looked like just another group of camera-toting American tourists, but they represented a totally new kind of American invasion.

Tha group consists of 46 science and mathematics teachers plus assorted dependents. They are the first wave of a unique experiment flust could have far-reaching impact on the field of education.

All have signed two-year contracts to teach in the Hamburg public schools. How auccessful they will be-given the formidible problems of working in a different language, culture and educational system-is a hotly debated matter of conjecture at the moment.

But what bappens in Hamhurg during the coming school year will be closely watched by officials grappling with a chronic teacher shortage in other parts of West Germany. and if Hamburg's gamble turns out well, it seems certain that within a short time recruits from America will be prominent fixtures in Wert German school systems all the way from the Baltic Sea to the Bavarian

Applications

For the one thing that Hamburg officials have learned for certain so far is that there is no dearth of well-qualified Americans eager to gra. 1 both the challenges and opportunities of the experiment. When the city began to explore the possibility of biring American teachers, it received more than 500 applications.

As a result, it has been able to pick a tentative group of 81 teachers (the second wave of 37 la scheduled to arrive here on Sept. 8: whose credentials would cause boasting by any school superintendent in the United States, Of those who arrived today, 24 have doctorates and the rest hold master's

46 Science and Math Teachers To Teach in Schools in Hamburg

They have selzed the chance to come even though the salaries they will earn here are considerably less than the norm at home and a host of resettlement and readjustment problems still await resolution. Only a few speak German with anything approaching fluency. and those with families face the difficult task of finding adequate housing.

Yet, all of them seem to share the bubbling enthusiasm of Dick Bukowski, a soft-spoken. 29-year-old math teacher from Champaign, Ill. Says he:

"I guess there will be difficulties but right now I'm ecstatic about the idea. It's a fantastic opportunity to do lots of things I always wanted to do at once—to try a job that gets you out of a rut, to live in a different country for a while, to try to perfect a foreign language, to travel and meet new people."

The reasons cited by the others are mostly variations on the same theme. Although the members of the group range in age from 24 to 53 and includa both miniskirted girls who still look like coeds to gray-haired men trailed by wives and children, all express a common desire to seek a temporary resplte from well-worn routines and pursue long-standing yearnings for travel and adventure.

Some bave extra-special reasons for coming, Rudolph Gross, 40, and his wife. Annaliese, left their native Stuttgart 16 years ago to emigrate to the United States. In the years since, he has studied biology at the University of Maryland and taught it at Purdue University in Indianapolis. Now he wants to "lire for a while in my old homeland and see what has happened here."

The principal responsibility has rested with Günter Apel, 44, a member of the city's governing senate who bas responsibilifor schools, youth and vocational training. After hearing how space-industry cutbacks and school budgetary

problems were creating a large surplus of scientifically trained people in the United States, Mr. Apel decided to see whether the American oversupply might be used to ease Germany's critical shortage of teachers.

He and his subordinates in the Hamburg schools administration then mounted a discreet recruiting campaign that was conducted mostly by matt. As incentives, they offered to pay the travel expenses of those hired and stressed the psychological benefits of the opportunity for travel and the chance to take part in an unprecedent-ed educational experiment.

The salaries offered are not very exciting by American standards. Depending on age and number of dependents, they will range from under \$600 monthly to slightly more than \$700. However, Mr. Apel claims that when these sums are translated into German purchasing power they are considerably more respectable. In addition those who stay the full two years will benefit from exemption from both German and American taxes.

Judging from the response though, Mr. Apel need not have been apologetic about the salaries. So many highly qualifled people wanted to come that Hamburg school officials now spend a lot of time referring the excess applications to other West German states that are exploring the Idea.

Next Problem

Having hired a well-rounded group qualified to teach math, physics, chemistry, blology and geology, Mr. Apel'a next prob-lem is how to integrate them into the Hamburg school year. which begins at the end of August. The biggest immediate problem is the language barrier, and critics of the program are not very optimistic that it can be overcome.

Mr. Apel, however, thinks differently. Before they begin teaching, the Americans will

take an intensive, four-week course in German, and the hope is that this will build up their command of language sufficiently for them to more into the classroom.

Those who need it will also get supplementary instruction in German during the school year. In addition, Mr. Apel has plans to use 12 or 13 of the Americans to teach senior high classes in English as an experiment to determine how well the students, who will have had several years of English, can absorb scientific Instruction in that language.

Another big problem is the shortage of housing that is both adequate and within the salary range of the Americans, partic ularly those with families. On their arrival, they were all given temporary lodgings in a variety of university student domnitories and residences.

There was some wincing over the spartan nature of the accommodations and over the fact that husbands and wives found themselves separated, but most of the ar ivals seemed to ba taking the situation in stride. Mr. Apel has mounted a public appeal for Hamburg's people to offer appropriate housing, and everyone involved appears confident that the problem eventually will be resolved. The officials are realistic in

predicting that not everyone will be rappy, that some will fail to overcome the language problem and that others will simply prove to be inadequate teachers. As a result, there is expectation that some attrition will take place when the sixmonth probationary period stipulated in the contracts expires.

But Mr. Apel and others who have helped to plan the program remain convinced that it can work and that most of the Americans will have a successful two-year stint here, And, as they demonstrated on Brrival, if the Americans do fail, it will not be for lack of enthusiasm and effort. When Mr. Apel greeted them

at the airport, he cautioned: "In many respects, things will be different from the American way of life." He was answered with cheers and shouts of "When do we start?"

REAL ESTATE TO LET, REAL ESTATE FOR SALE

British MP Marcus Lipton showing a chastity. to Janet Watson in London Saturday-apparently 1 the sake of the Associated Press photographer

PEOPLE:

The British Parliament was called on Saturday to rule, on whether a chastity belt is an

item of clothing or a safety device. Marcus Lipton, R Labor party member of Parliament who has represented Britain at several international conferences, put forward a motion for the Chancellor of the Exchequer, Anthony Barber, to answer today in the House of Commons.

"The customs says that chastity belts are a minor item of clothing and as such are eligible to purchase tax. I don't know what they would say about breast plates," said Lipton.

"I want the chancellor to reverse the customs that chastity belts are items of clothing and not a safety device." There is no pur-chase tax on a safety device.

"Being a 70-year-old widower, my interest in chastity belts is purely academic, but they are valuable dollar earners and play an important part in our balance of payments," Mr. Lipton said. A British firm sells \$13 replicas of the 13th century chastity belts all over the world

Robin Hugussen, a pariner in the firm involved with chestity belts, said: "We have sold several" thousand chastity belts to all parts of the world. They are not just a gimmlek. Some of the letters we receive are very serious." He said orders have been received from such places as Tibet,

What Price Chastity?

Nepal, the United States, "Once I was called to Harrog

in England early one day to h feed fa the keys of the pacifick held of the keys of the pacifick held of the her belt in place," said fingular tributes as an item of clothing were set to about 11 percent purells fall tax.

"It seems absurd that foreign spile can buy these belts without attack, but the British husbards paid S. tax, but the British husband, and state who wants to pretering a out on the bolt.
